**A Career in Agri-Business Offers a Rewarding Future**

Agri-business has the answers to the big challenge of the seventies... feeding the poor and underprivileged in our own country... exporting food and technical know-how to help other countries solve their own food problems. Take your pick of professions... there's a need for agriculturally oriented people in all major industries, in government, in teaching as well as the actual production of food and fiber.

If change is your challenge, agri-business is your field. A career in agri-business will equip you to make a substantial contribution to humanity through service in the Peace Corps and other agencies which supply technicians to other countries.

One thing more. You don't need a farm background to follow a career in agri-business. Modern agriculture can be and is learned in the classroom without benefit of exposure to practical application.

**Consider a Career in Agri-Business**

Science, Finance, Research, Teaching — you can "do your thing" in agriculture. It's the oldest and most basic industry and promises to be the most critical for many years to come.
