Social Security Discontinues Evening Hours

The Social Security Office located at 225 W King St., Lancaster, will discontinue Thursday evening hours effective Wednesday, Oct 1

Charles T McCoy manager, in announcing the termination of these evening hours cited the sharp decline in number of visitors on Thursday evening as the main factor McCoy noted that most people prefer visiting the office during regular hours when a full staff is on duty The office is open each day, Monday through Friday, 8 30 a.m to 5 p.m

McCoy also mentioned that a visit to the office can often be avoided by calling 393-5861 to see if the business can be transacted by phone People unable to visit the office during regular hours, should call the office so that arrangements can be made to provide the necessary service

Crossed Barrier

Earliest known Europeans to cross the entire Himalayan barrier were groups of Jesuit and Capuchin priests from China and India, who established short-lived missions in Tibet in the early 17th century

Conservation Corner

"I don't believe in conservation . . . but look who I am."

NEW
weather beater
from Pioneer®

Apply Lime In The Fall For A Better Crop Next Summer

Fall liming assures proper limestone distribution in the soil, ready for spring planting. The freezing and thawing of winter aid in the process of limestone dissemination. So, why wait, correct your soil deficiency now by liming, and reap a bigger harvest next summer.

MARTIN'S LIMESTONE

Blue Ball, Pa. 354-4125

Gap, Pa. 442-4148

Sudan Grass

The use of frosted sudan grass or sudan-sorghum hybrids needs special care in order to prevent poisoning of livestock. Many dairymen are using this type of forage crop to help with the Summer feeding program. After a killing frost, the crop should not be used in a fresh condition. It should be either made into silage and allowed to ferment for at least 30 days, or permitted to die in the field for at least one week and then used as hay

or bedding. After the plants are completely dry and dead following a frost, they are safe to use. However, new growth coming from the roots after a killing frost is dangerous to use until it would reach a height of 24 to 30 inches. Special handling of these forage crops after a killing frost is necessary in order to prevent losses from poisoning.

Arcadian Liquid.

Now's the time to seed and feed wheat.

Start wheat faster with exact prescription-analysis in every drop. That's why more growers are converting to Arcadian SLF mixed liquid. It doesn't limit you to five or six grades. We prescription-mix N-P-K plus minor elements in the exact ratio your wheat crop needs for strong, vigorous growth. It contains new Poly-N® which gives you 100% water soluble phosphorus enriched with new polyphosphates. Gets wheat off to a faster, deep-rooted start. And

you also get three forms of nitrogen for fast response plus sustained feeding. You'll like the way Arcadian liquid saves labor. Loading and applying is far easier and faster than dry materials. All you lift is the end of a hose. So unless you enjoy lifting fertilizer bags, try Arcadian SLF liquid. The faster, labor-saving, more profitable way to seed and feed wheat.

See me now.
