

Enos Heisey Is Host On People Good Will Tour

Enos B. Heisey, prominent agricultural leader and well known Field Manager of Public Relations Agway Inc., has been selected and named as host for a delegation of Pennsylvania agricultural leaders on a twenty-two day Goodwill People-to-People inspection mission throughout Africa.

The Pennsylvania delegation will depart New York on October 31, 1970. They are scheduled to take part in numerous visitations with their occupational counterparts, as well as participate in numerous meetings and interviews with United States and foreign government representatives.

The Goodwill Mission will take the Pennsylvania citizens to Por-

tugal, Republic of South Africa, Kenya, Ethiopia, and Egypt. Membership in the Pennsylvania People-to-People delegation is limited to official and personal invitation only. The entire Goodwill Mission is arranged and designed to implement the aims and purposes of the United States cultural visitation exchange program and endorsed by People-to-People, Inc., Kansas City, Missouri.

Its purpose is to promote understanding and goodwill, both for the American people and the American government, to tell the story of democracy during face to face visitations and to improve relations and feelings toward the American people.

Heisey resides at 236 East Glenn Road, Hershey, Pennsylvania.

There are days when disgruntled husbands feel that the wedding ring should be worn in the nose, rather than on the left hand.

Farm Group Favors New Show Site

The Pennsylvania State Council of Farm Organizations is on record as favoring a new Farm Show Building to be constructed on a new site.

The Council voiced its sentiments at an annual meeting by passing a resolution recommending "construction of new facilities at a new location."

Harold Ely, president of the Council said rebuilding the Farm Show complex on the present site as advocated by certain groups, would be unsatisfactory because of parking and traffic problems.

"On top of that, a renovated Farm Show building built on the present site would have to be a multi-storied structure because of the shortage of land," Ely said. "Exhibitors and shows now using the building are aware of spectator reluctance to move from one story to another."

The Council also passed a resolution advocating that J. Lin Huber, currently acting as chairman of the Milk Marketing Board be reappointed for a full term on the board.

Other resolutions:

Opposed revision of the motor vehicle license fees.

Favored wise use of agricultural land.

Favored a study of the feasibility of establishing a school of veterinary medicine by Penn State.

Recommended the Pennsylvania Department of Agriculture receive sufficient funds to fulfill requirements of the meat inspection law.

Ladies, Have You Heard? . . .

Check Coats On Sale For Quality Construction
You'll find winter coats on sale as stores offer special features during the winter months. To help you make the right decision about the coat you buy, keep these tips in mind:

You can usually find a coat that fits reasonably well without major alterations if you know your figure type.

Keep trying on coats until you find one with a good fit.

Look in a triple mirror to check fit. The coat should be comfortable and not strain when you raise your arms.

Look for a style that's becoming to you. Keep in mind the rest of your wardrobe when you buy a winter coat.

If you expect a coat to last several years, high fashion colors promoted for one season may not be a good buy.

Zip-in linings extend the wear of a coat, and make it suitable for both cool and cold weather.

However, insulated type linings which cut down on the weight of a coat may not give enough warmth in cold weather.

Linings need to be serviceable and good-looking.

Good workmanship gives the mark of quality.

In Case Of Pesticide Emergency

If someone in your family accidentally swallows a pesticide, the very first thing to do is to go straight to the pesticide container and administer first aid recommended on the label.

Call your doctor immediately and read him the label containing the active chemical ingredient of the pesticide.

If you go to a doctor or hos-

pital for help take the container with you.

The more toxic pesticides are marked POISON and have an antidote listed on the label.

In many areas there is a poison control center. Consult your local phone directory to see if there is one near you.

A good way to prevent a pesticide emergency is to properly dispose of the container.

Whatever you do, don't put anything into an empty pesticide container.

Wrap empty containers or those with unwanted pesticides in several layers of newspapers and promptly put them in the trash can.

Don't burn a cardboard container or a sack that has contained a pesticide.

Smoking is taboo when you are using a pesticide. All pesticides can be carried from hand to mouth by your cigarette and some are flammable.

Keep children away when you are mixing or using pesticides.

Good Idea For Grimy Jobs

If an old shirt is so torn and worn that it's not even of use to charity, cut off the sleeves and keep them, along with a couple of rubber bands, in the trunk of your car. If there's a tire-changing job to be done, slip them over your arms and they'll keep your sleeves clean.
