ciate County Agent, said the tobacco entries were about forty hands fewer than last year but could give no reason for the decrease.

Judges for the local show were A. K. Mann and Lester Whitmore.

Placings were as follows:
Long Wrappers—Roy M. Rohrer, Eugene M. Rohrer, Witmer J. Rohrer, Michael E. Rohrer, Harold B. Wissler

Short Wrappers—Roy Rohrer, Witmer J. Rohrer, Michael Rohrer, Eugene Rohrer, Beatrice Hostetter.

Long Fillers—Roy Rohrer, Michael Rohrer, Witmer Rohrer, Latty Shank, Eugene Rohrer

Short Filler—Roy Rohrer, Michael Rohrer, Eugene Rohrer, Witmer Rohrer, J. A. Hostetter.

Long Binder—Witmer T. Rohrer, Roy M. Rohrer, Michael E. Rohrer, Eugene M. Rohrer, Ross B. Denlinger

Short Binder—Roy M. Rohrer, Witmer J. Rohrer, Eugene M. Rohrer, Michael E. Rohrer, Ross B. Denlinger

● Special
(Continued from Page 1)

formerly of Neppco, and Ray Delano (Dunham, New Hampshire) Manager of the Northeastern Egg Marketing Association

According to Hendrik Wentink General Manager of Marketing and Farm Operations for Miller & Bushong, Inc., these gentlemen have been in the forefront in trying to cooperatively achieve a better and more honest way of discovering the true egg price. "They are also very knowledgeable in most every phase relating to the business end of egg producing and marketing, and on these subjects will also be happy to answer questions from the floor," he said.

● Grange
(Continued from Page 10)

1st Quaintville Richard Maule, Clifford W. Holloway Jr. and Alfred Wanner will accept reservations until January 14. Mr. and Mrs. Lorian Buntin are on the Pomona visitation committee. A memorial service will be in charge of Mrs. Charles McSparran. The new officers will be installed by Norman Maule and his team from Chester County assisted by Mrs. Virginia Beck soloist and Mrs. Richard Jackson pianist from Lancaster County.

The 60-cent a dozen average price Pennsylvania farmers received for eggs in December was the highest since the October 1953 price of 64 cents.

The State Crop Reporting Service, which made the price announcement, said the December egg price was up eight cents from November and 15 cents higher than in December 1968.

The Service said higher meat animal prices also attributed to a two percent rise in state farm prices during December.

Hogs at \$26.20 a hundred weight were \$1.20 higher than in November and \$7.20 higher than in December 1968. Steers at \$27 a cwt were 30 cents higher and up \$2 from December 1968. Bidders at 16 cents a pound were one cent lower than in November.

Milk at \$6.40 a cwt was 10 cents less than in November and 14 cents more than in December 1968.

Corn was up seven cents a bushel, wheat up four cents, and oats up three cents from November prices.

Nationally the index of prices received by farmers was the highest since September 1952.

Amos Sauder Is Second In State Corn Contest

A local FFA youth will be honored for his corn production project at the Farm Show according to a report issued this week.

Amos Sauder, Sophomore at Manheim Central High School, will be honored at the Pennsylvania Crop Reporting Association Banquet for his one-acre corn plot that produced 181 bushels of ear corn on test.

Sauder, 15, is the son of Mr. and Mrs. Amos Sauder, Manheim RI. His yield placed him second in Pennsylvania and first in the maturity group four.

● Facts
(Continued from Page 6)

credit for all his daughters in DHIA herds.

In October, 1969, there were only 34 herds in Pennsylvania under quarantine for Brucellosis. Eleven counties remain to be certified Brucellosis-free. Most of these have only one or two herds in which a single reaction exists. Many problems involve suspects which have been vaccinated of heifer calves with Strain 19 vaccine. Calfhood vaccination is still a part of the Pennsylvania Bureau of Animal Industry program.

Some persons are too big for their bitches and you see 'em every day in the supermarket.

Unhappily, when you apply conventional fertilizers, much of the phosphate is locked up through fixation in the soil.

□ Up to now, this has been fought by carefully placing the phosphate closer to the surface and near each plant. Trouble is, this leaves your phosphorus supply "high and dry" during the heat of the summer. □ Ortho solved this problem during the development of UNIPELS. A unique "phospho-nitric"

process makes the phosphate in UNIPELS 100% available, yet makes it resist fixation regardless of how it's applied!

How much of the phosphate you apply is actually used by your crops?

□ And when you plow down UNIPELS in the fall, the phosphorus and other vital nutrients are down in the moisture zone where roots are most active in the hot, dry summer. □ Come see us soon about the year 'round benefits of fall fertilization with Ortho UNIPELS — the All-Season Fertilizer.
