

What's New?

New Catalog

A new 16 page catalog covering the complete line of Avi strap polypropylene strapping materials, tools and accessories, automatic strapping machines, and strapping systems has been published by the American Viscose Division of FMC Corporation. Copies are available from FMC Corporation American Viscose Division, Industrial Packaging Department, 1617 John F. Kennedy Blvd., Philadelphia, Pa. 19103

Brush Hopper

E. L. Caldwell & Sons of Corpus Christi, Texas, have introduced the Caldwell Challenger, a new brush hopper designed to work in rocky or stumpy terrain without damage to the blade or drive train.

Infra-red Heaters

Aitken Products Inc. Cleveland, Ohio, have announced a new line of portable electric infra-red heaters for both indoor and outdoor use.

Hamilton Spritzer

Hamilton Equipment, Inc., Box 478, Ephrata, has introduced a low cost small diameter irrigation pipe and fittings called 'spritzer' which is ideally suited

for solid set seed beds, plant beds, nurseries, gardens, lawn and turf. The spritzer uses a quick coupler of cast aluminum and 1 1/4 inch class 160 PVC pipe adaptable to any type irrigation equipment.

King Size Corn

Sales Associates, P. O. Box 1107, Santa Monica, Calif., is pushing King Size Corn Seeds from Peru, designed for backyard giant corn trees, as a conversation piece.

Nursery Herbicides

Dr. Craig Oliver, Penn State ornamental horticulture specialist, has compiled 1970 Weed Control recommendations for ornamental crops listing herbicides to which plants are tolerant. Nurserymen can get a copy of the 18 page circular from the county agent's office.

Enthusiasm Pays

Clothes you buy with enthusiasm give you pleasure when you wear them, reminds Mrs. Mae B. Eaton, extension clothing specialist, Pennsylvania State University. Choose the style garment best suited to you and your figure, not just because the garment is in style. Always try on dresses, suits, and coats to check their comfort and appearance.

Tree Deadline

The deadline to order trees from the state nursery has been extended from February 15 to March 15 because applications from landowners for state trees have been very slow this year. To date Lancaster County landowners have ordered only 12,000 trees, enough to plant about 18 acres.

In past years the total of all tree orders in the county has often exceeded 100,000.

The 1968 publication, "Timber Resources of Pennsylvania" by the U.S. Forest Service, lists 3,600 acres in Lancaster County as needing reforestation.

Trees from the Department of Forests and Waters Nurseries are available to private landowners to use for timber production, watershed protection, soil erosion control, and wildlife food and cover. The cost to the landowner is \$6.00 per thousand.

Trees can be delivered to a central point in each county for an additional \$1.00 per thousand or the landowners can pick them up at the nursery.

For nursery stock applications and further tree planting information contact District Forester, Pennsylvania Department of Forests and Waters, Port Kennedy, Pa. 19463.

GET MORE FOR YOUR MONEY

With A Big Dutchman Automatic Poultry Feeding System

PATENTED RE-MIXING
INTAKE WHEEL

You get more eggs from your feed dollar because our exclusive, patented re-mixing intake wheel in the feed hopper re-mixes uneaten feed returning from the trough with fresh feed. That means all of the feed is used. Your birds get the full ration, and feed is not wasted. The result is better feed conversion. The Big Dutchman chain-in-trough feeding circuit strengthens this benefit by

"carrying" the whole feed to the birds. Feed is not dragged or forced by any mechanism that has a grinding, separating action.

These are real advantages that give you more out of the feed you buy, and more out of the hens you feed. For more information on money-saving layer cages and feeding systems see your nearest Big Dutchman representative or write:
