

What's New?

Livestock Health Feed Holstein Calf Report

H-Z Animal Health Products, Lutz and New Holland (733 4466 and 354-7935), has announced a new nutritional livestock conditioner feed to make animals healthier. The feed differs from mineral products because of the addition of enzymes and fermentation products. Research and personalized help are available.

Vinyl Repair

Naugahyde and Vinyl Repair, a colorless solution which forms a permanent chemical bond with the damaged material is reported ideal for many household uses, cars, trucks, campers, trailers or boats. Available to individuals, distributors and dealers at Newport Enterprises, P.O. Box 286, Orange, Calif.

Torch Idea Booklet

For a new 64-page booklet of 139 farer ideas for the oxy-acetylene torch on the modern do-it-yourself farm, send 50 cents in coin or stamps to cover postage and handling to Education Department, Smith Welding Equipment Division, Tescom Corporation, 2633 S E Fourth Street, Minneapolis, Minn 55414

Artificial Chamois

Super Chamois, the artificial chamois made of Tufcel, has recently been introduced by Manin International, Inc. of Chicago. Imported from Japan, the new chamois offers consumers the advantages of natural chamois plus the wearing qualities of Tufcel. Cost is considerably less than the natural chamois.

Agway has reported development of a consistent method for growing groups of 35 Holstein bull calves from four days old to 250 pounds in 14 weeks with rarely more than five per cent mortality. The three years of research is compiled in a 12-page report, "Agway Dairy Beef Feeding Program," available from your local Agway service or by request to Agway Inc., Box 1333, Syracuse, N.Y. 13201

Beam Milk Testing

Electronic apparatus using a beam of light can check milk for butterfat content and automatically record the results for 180 samples an hour, according to a study by the New England dairy industry, which is concerned about the old problems of accurate tests of milk quality and composition.

While the new machines carry a high price tag, but can rapidly and accurately test many more samples than older methods.

Metered Feed

Farm Fans, Inc. has introduced an advanced design Blend-Mill, a new patented metering system with reciprocal rake to provide accurate, consistent metering of feed delivery.

Grain Dryer Brochure

A copy of the 1970 brochure on the 1970 line of American Automated Grain Dryers is available from the American Farm Equipment Co. Division of AFE Industries, Inc., Lake Zurich, Ill.

U.S. Ups Milk Price 38 Cents

Secretary of Agriculture Clifford M. Hardin today announced the support price for manufacturing milk will be \$4.66 per hundredweight in the 1970-71 marketing year. This is up 38 cents from the \$4.28 level of a year earlier, the Secretary said. The support price for butterfat in farm-separated cream will be at 75 per cent of parity.

Support price for manufacturing milk for the marketing year which begins April 1, 1970, is for milk of average milkfat content (approximately 3.69 per cent). This is 85 per cent of the latest parity equivalent price published on Feb. 28, 1970. The law provides for support at prices between 75 and 90 per cent of parity as of the beginning of the marketing year.

The present support price of butterfat of 68.6 cents per pound is 75 per cent of parity as of the beginning of the 1969-70 marketing year. Based on the latest parity data, it is 72 per cent of parity. The exact amount it will be necessary to increase the butterfat support price will be known when parity data become available on March 30, 1970.

The specific support price for butterfat and the prices at which the Commodity Credit Corporation will buy butter, Cheddar cheese, and nonfat dry milk in order to carry out the support will be announced on March 31.

Prices received by farmers for manufacturing milk (adjusted to average milkfat content) averaged \$4.69 per hundredweight in February 1970. The \$4.66 support price will mean continuation of prices at about recent levels.

ALFALFA

With

EPTAM[®]

SELECTIVE HERBICIDE

Nurse crops are a thing of the past for alfalfa growers who use Eptam in spring-seeded stands.

By controlling weeds and grasses early growers report yields of 3 to 5 ton of pure hay per acre the very first season.

Strength, Performance, Dependability. You've got 'em all
with VAN DALE'S NEW TRAVELING BUNK FEEDER.

Van Dale's SCF-1400 is the traveling feeder to put you on the track to faster, more profitable operations. Automatically, it delivers up to 40 tons of silage per hour to bunks on a single chain, continuous "shuttle" service.

Feeder trough chain is No. 67 pin-tle (12,500 lb. strength) and drive chain is C-550 steel (average top strength of 10,000 lbs.). Interlocking, snap-together galvanized metal components reduce erection time as much as 50%. Suspended or floor-mounted, rails are mounted with Van Dale's exclusive clip-on brackets to provide extra-rigid support. Unit adapts to any feeding need in-barn or out-of-doors.
