MOUNT JOY R. 1, PA.

## Introducing . . . The B-305

Q. Is there any relationship between the now "World Famous" Babcock B-300 and the new B-305?

A. Yes, a very close relationship. Let's say, for sake of example, that four inbred lines called A, B, C and D are used to produce the B-300. We mate A and B together to get the female parent of both the B-300 and B-305. To produce the B-305, we then replace line C with line L on the male parent side. We, therefore, end up with 75% of the same make-up for the B-305 as the B-300.

**Babcock Hatchery, Inc.**

Box 285, Lititz, Pa.

**RAISING PULLETS on YOUR FARM?**

**WE RECOMMEND**

**MUSSER'S M-327 CHICKS**

The breed of 2 separate lines of Musser Leghorns, which when crossed, produced the sturdy M-327 Leghorn chick that you have been hoping for.

Why?

**Because Musser's M-327 Chicks have . . . .**

1. Coccidiosis under control to the extent that you seldom have a minor outbreak of Coccidiosis
2. A consistent low level mortality rate, while contending with the highly publicized leukosis (Marek's) disease
3. The mortality and the rate of lay so satisfactory that you can be assured of a yearling capable of showing a profitable second year
