

# The Old and the New

The turn of the century portable press is shown in operation.

The baler of the '70's with bale throwing attachment heaves a bale onto a trailing wagon.

## Virus Inoculation May Stop Marek's Disease

A virus, newly isolated from turkeys, shows promise for the control of Marek's disease, according to reports of research conducted at Michigan State University

The turkey virus causes the chicken's body to produce antibodies similar to those formed

in chicken infected with the herpes virus that causes Marek's disease

So far, the turkey virus has not caused disease in chickens or turkeys. Tests have shown that chickens inoculated with the non-pathogenic virus were protected against attacks by the Marek's disease virus

## Feds Hit 2,4,5-T Use Around Homes

The federal government has taken steps to halt the use of the controversial herbicide 2,4,5-T as a weed-killer around homes.

The order immediately halts interstate movements of the liquid herbicide. The nonliquid forms, not considered as immediately harmful, will remain on sale, however.

The federal action does not affect sales of the herbicide al-

ready on retail store shelves, nor can it stop use of commercial products containing the herbicide already purchased by home gardeners. The action does not affect uses of 2,4,5-T for control of weed and brush on range, pasture, forest, rights of way and other non-agricultural land. These areas account for most of the use of the herbicide in the United States.

# Sutan®

Selective Herbicide

## lets your corn grow free

Your corn grows free from many grassy weeds. Free from the growth stress weeds cause. Free from their competition for soil nutrients and moisture needed to let your hybrids reach full bred-in yield potential. Free from extra cultivations, possible root damage and free from weedy fields that slow your harvest.

This season, use dependable, economical Sutan on your corn acreage. Stop the toughest grasses. Your corn grows free from the competition of nutgrass, crabgrass, fall panicum, foxtails, Johnsongrass seedlings, goosegrass, shattercane and others that reduce your yields. Liquid Sutan is easy to handle and apply. Mix Sutan in the soil as you make your seedbed. There's no need to depend on unpredictable rainfall to move the herbicide into the weed seed zone. Sutan will be waiting to control weeds as they sprout. Used at recommended rates, Sutan controls weeds without leaving harmful residues in the soil. Free yourself from work and worry. See us now for Sutan.
