

# Major Poultry Groups Meet Jointly in Washington

(Continued from Page 25) jointly sponsor an egg marketing school, and a report on environmental pollution and its potential impact on the poultry industry. By motion, the three groups

went on record as supporting the Stubblefield bill (H.R. 16092). Also approved was a motion that the egg committees of each organization study the feasibility of conducting a jointly-sponsored Egg Marketing School.

The three Boards commended the National Egg Pricing System Study Committee for its work to date, but recommended that a full explanation be published on why the public meeting of April 15 was aborted and urged the Committee to make either a final or interim report to the industry at the earliest possible date.

A resolution by Associated Poultry & Egg Industries urging USDA, in its reorganization of its meat inspection service, to assign only trained poultry meat inspectors to poultry processing plants, was reaffirmed.

Some 35 officers and directors of the three regional associations attended the meeting. Marvin Johnson, president of Southeastern Poultry & Egg Association, presided. Afterward, the directors hosted some 30 Senators and Representatives at a reception held in the U.S. Capitol.

## Sutan<sup>®</sup> + atrazine lets your corn grow free

Your corn grows free from all major grasses and weeds. Free from the growth stress that weeds cause. Free to develop strong, vigorous roots that reach down to make maximum use of soil nutrients and moisture. Free from extra cultivations, possible root damage and free of trashy fields at harvest time.

This season, use dependable, economical Sutan plus atrazine on all your corn acreage. Stop the toughest grasses and weeds—nutgrass, wild cane, foxtails, fall panicum, Johnsongrass seedlings, crabgrass, annual morningglory, lambsquarters, pigweed, ragweed, nightshade and others that lower your profits. Mix Sutan plus atrazine in the soil as you prepare your seedbed. There's no need to depend on unpredictable rainfall to move the herbicide into the weed seed zone. Sutan and atrazine will be waiting to control weeds as they sprout. Used as directed, Sutan controls weeds without leaving harmful residues in the soil. Free yourself from work and worry...see us today for your supply of Sutan.

# Arcadian Liquid.

## Best way to plowdown.

**Tailor-made to your soil needs.** That's one reason Arcadian SLF complete liquid fertilizer is ideal for plowdown. We can mix any N-P-K ratio you want, and add the exact amount of trace elements needed for balanced growing power. When nitrogen only is needed, we provide Golden URAN<sup>®</sup> and NITRANA<sup>®</sup> U in both winter and summer grades.

**Even, accurate application** is assured with Arcadian liquid. It won't segregate, clog or set-up. Produces even stands for consistent maturity. Arcadian liquid sprayed on before plowing completely coats crop residues for faster breakdown into humus.

**Liquid saves time and labor.** Arcadian liquid is the easiest and fastest fertilizer you can use for plowdown. Pumps and hoses do the work. You also cover the field faster because

there's no need to overlap application patterns with liquid. Count on us and Arcadian liquid for best results from plowdown.

In quietness and in trust shall be your strength.

—(Isa. 30:15).

When something makes us miserable, make use of the power of affirmation. An affirmation of truth sets our thoughts and feelings in a new direction. We can make use of easy affirmations such as: "We shouldn't be upset, because God is in charge, and through Him we will be able to act intelligently and effectively to handle any situation."

Pick a John Deere 1020 or 2020 to work integral tools, get this bonus...

**Draft-link sensing — with selective response-control to match job and conditions**

Integral tools are pulled by the lower links, so they "feel" the changes in soil conditions first and fully. That's why "1020" and "2020" Tractors hydraulically "sense" load changes through the draft links. But not all conditions call for the same sensing response, so John Deere provides three response selections. **LOAD**—automatically adjusts depth to maintain constant draft load. **LOAD-DEPTH**—automatically provides weight transfer as needed. And **DEPTH**—maintains tool depth you set through thick and thin. Be our guest for an on-your-farm test of "1020" or "2020" selective response. Credit? Of course.
