## RAISING PULLETS on YOUR FARM?

WE RECOMMEND

## MUSSER'S M-327 CHICKS

The breed of 2 separate lines of Musser Leghorns, which when crossed, produced the sturdy M-327 Leghorn chick that you have been hoping for.

Why?

Because Musser's M-327 Chicks have . . .

1. Coccidiosis under control to the extent that you seldom have a minor outbreak of Coccidiosis
2. A consistent low level mortality rate, while contending with the highly publicized leukosis (Marek's) disease
3. The mortality and the rate of lay so satisfactory that you can be assured of a yearling capable of showing a profitable second year.
