Introducing . . . THE B-305

Q: Do you have any commercial field data on the B-305?

A: Yes, we are beginning to collect excellent records on this bird. We have just received the records on one flock of 12,000 layers in production for 12 months, that showed excellent production with only 6.8% mortality for the total laying period. Please write, and we will be happy to send you production records that we have.

Babcock Hatchery, Inc.

Where in the World is Babcock? . . .
 Wherever eggs are produced at a profit!

RAISING PULLETS on YOUR FARM?

WE RECOMMEND

MUSSER'S M-327 CHICKS

The breed of 2 separate lines of Musser Leghorns, which when crossed, produced the sturdy M-327 Leghorn chick that you have been hoping for.

Why?

Because Musser's M-327 Chicks have

1. Coccidiosis under control to the extent that you seldom have a minor outbreak of Coccidiosis
2. A consistent low level mortality rate, while contending with the highly publicized leukosis (Marek's) disease
3. The mortality and the rate of lay so satisfactory that you can be assured of a yearling capable of showing a profitable second year
