

Holstein Breeders Slate Annual Field Day July 21

The Lancaster County Holstein Breeders Association will hold the Annual Field Day on Tuesday, July 21 at the farm of Curtis E. Ake, Quarryville, RD1.

The judging contest with Jack

Faehild, well-known Holstein breeder as official judge, will begin at 10:30 a.m.

At noon there will be a chicken barbecue for \$1.25 with milk and ice cream furnished.

The afternoon program will begin at 1:30 p.m. Prizes will be awarded to the winners of the judging contest. Speaker will be Jack Faehild.

Members of the Holstein Field Day Committee are David W. Sweigart, James Krieder, and Donald Eby.

Persons attending have been advised to reach the Ake's farm by traveling south on Route 222 and turning right at Solanco School. After taking the first road left, the farm is first on the right.

place plaque and \$100 check for chapter's safety program; back row, left to right, Delmar Weaver, land judging, Grassland; Dale Weiler, small gas engines, Grassland; Gerald Weaver, small gas engines, Grassland; Dale Groff, land judging, Cloister; Ken Sensenig, poultry judging, Cloister; Dennis Landis, machinery adjustment and farm power, Penn Manor.

DIFOLATAN® 4 FLOWABLE

The only flowable fungicide
made to fight potato blight.

Last year we introduced DIFOLATAN 4 Flowable. This year it's the fastest selling potato fungicide on the market.

There are a lot of reasons for this. One is that DIFOLATAN is the only completely flowable fungicide you can buy. That makes it easier to handle. There's no dust to bother you when pouring it. And because it's flowable, it goes through any nozzle. In other words, it won't clog your equipment.

And when it comes right to the heart of the matter — fighting blight — ORTHO DIFOLATAN is better than any fungicide being sold today.

It gives excellent protection against both early and late blight. And is particularly effective against tuber rot.

DIFOLATAN sticks to the plant, resists weathering from rain or sprinkler irrigation. That means you can maintain your schedule without worrying about the effects of weather or irrigation.

Protection against tuber rot is outstanding. When you put potatoes in storage, you'll never know how well you did in the blight fight until you've shipped the last of them. Fields may look reasonably healthy before harvest, but if you put infected tubers into storage, you can find yourself with a costly, heavy cull out of late blight tuber rot infection.

DIFOLATAN works to give you greater yields of healthy potatoes. And—because it's flowable—it does that even better.

The first time you use DIFOLATAN 4 Flowable will be the last time you ever see potato blight.

Another good thing about the fastest selling potato fungicide. It works on cucumbers, melons and tomatoes, too.

WHAT MAKES AN IDEAL BALE

... AN ALLIS-CHALMERS 300 SERIES BALER

UNIQUE TWIN-FEED rakes work in true coordination to move a smooth, continuous stream of hay into the baling chamber.

A heavy, welded ram pushes each charge with controlled compression. Every charge is precision sheared by the scissor-cutting action of a high-carbon steel knife. And a job-proven wire-twister or twine-knotter binds each bale tightly enough to stop a Houdini.

The result is an ideal bale... strong, square, uniform to take bounce after bounce without breaking. Come in and find out why Going Orange is Going Great.
