For good production next lactation,

FEED PURINA DAIRY CONDITIONER

As a dairyman, you know that good milk production doesn't just happen. It's something you plan for by establishing a herd with the genetic potential for good production, then managing and feeding your cows so they'll produce up to their bred-in ability.

Many successful local dairymen also plan for good production with a proven program of dry cow feeding. They need Purina Dairy Conditioner, a research-proven ration to help give dry cows body condition they need for good production after they freshen.

Purina Dairy Conditioner is an extra-palatable 12½ percent protein ration. It's fortified with vitamins A and D plus extra phosphorus to help guard against milk fever.

Purina Dairy Conditioner is low-cost, too, because the amounts you feed depend on your cows' condition and on the quality of the roughages you feed. For example, a cow dried off in good condition being fed high-quality roughages would require less Dairy Conditioner than a cow in only fair condition being fed fair quality roughages.

Drop in soon and get your free copy of the Purina Dry Cow Program folder. We'll be glad to show you how Purina Dairy Conditioner can help you prepare your dry cows for good production next lactation.

Commonwealth Bank Earnings Up 20 Per Cent

The Commonwealth National Bank has reported earnings of \$1.89 million for the first six months of 1970.

The new bank formed last January by consolidation of Lancaster's Conestoga National Bank, the Harrisburg National Bank and Trust Co. and the First National Bank of York, logged a 20 per cent increase in net income before security profits for the first six months of the year compared with the same period in 1969.

Earnings per share amounted to \$2.71 not including security profits of 19 cents per share.

The June 30 deposit tally of \$319.1 million represents a \$10.5 million increase over the figures for the same date last year. Total assets on June 30 were \$375.1 million.

Ladies, Have You

(Continued from Page 17)

should be laundered separately because some bleeding of color may be expected.

The use of a fabric softener, added in the final rinse, imparts a fluffiness to towels. Follow directions for recommended amounts since too little is ineffective and too much can reduce the amount of moisture absorbed by towels. Since the effects of a softener are cumulative, skip their use after every few washes.

Generally speaking, towels are designated as bath sheets, bath towels, hand or face towels, and guest towels. As for color, solids start with white and run through pastels, medium tones into deep vibrant shades, right down to black.

In some families, each member has a color with combinations creating a harmonizing palette of shades.

Then there are floral and abstract prints and stripes. These are often coordinated with shower curtains.

And, third, there are jacquard-weave towels, a special weave in which the pattern and colors on one side are reversed on the other.

It all adds up to making towel buying fun and laundering as easy as ever.
