

UEP Calls for Faster Layer Sales

At a recent meeting in San Francisco, the board of directors of United Egg Producers unanimously adopted a program to help insure the sell-off of old fowl.

Jerry Faulkner, UEP general

Pa. Angus Assn. Elects Officers

Members of the Pennsylvania Angus Association, meeting in Annville on the eve of their annual field day, elected Sidney K. Stoner, Lewisberry, as president for the forthcoming year.

Other officers included vice president Robert Miller, Annville, and secretary-treasurer Cyril Velhsek, Lewisberry.

Activities at Robert Miller's Pleasant Valley Farm attracted 200 Angus breeders and got underway with a welcome by Harold Weil, head manager of the plantation, Queenstown, Maryland. Weil said, "Exotic breeds would have to breed a line of improvement to approach the quality and other advantages of the Angus breed."

Professor Herman Pudy, Pennsylvania State University, conveyed Park discussed different steer types with a live animal demonstration. What we are doing now in the Angus business, Pudy said, "is more right than anything else we have previously done because this change is based on economically important traits."

A panel discussion concluded the afternoon activities and included veterinarian Buileigh Anderson, from Loysville speaking on calfhood vaccination, Herman Pudy discussed ideal cow size and Glen Kean, Pennsylvania State University talking on quality meat.

World Omelet (Continued from Page 17)

sliding freely. Keep mixture as level as possible. When eggs are set and surface is still moist, increase heat to brown bottom quickly. To serve, fold in half or roll.

Bacon Omelet:

Prepare Basic Omelet sprinkle 2 tablespoons crumbled cooked bacon over half of omelet before folding.

Cheese Omelet:

Prepare Basic Omelet sprinkle 2 tablespoons shredded cheese over half of omelet before folding.

Jelly Omelet:

Prepare Basic Omelet, spread 1 to 2 tablespoons jelly over half of omelet before folding.

Onion Omelet:

Add 1 tablespoon chopped onions to egg mixture. Proceed with directions for Basic Omelet.

Herb Omelet:

Add 1/4 teaspoon crushed marjoram, basil or other herb to egg mixture. Proceed with directions for Basic Omelet.

POULTRY OR MEAT OMELET

Fold 1/2 cup diced or chopped, cooked chicken, turkey, or duckling meat into omelet mixture before cooking. Or add meat to 1 can (10 1/2 oz.) cheese or cream of mushroom soup. Serve over favorite omelet. Or try adding crisp crumbled bacon, cooked sausage, dried beef, smoked turkey, tuna fish or shrimp.

Try A Classified — It Pays

manager, said implementation will be as follows:

Each Regional Cooperative UEP Member has been assigned the responsibility of marketing a certain number of old fowl in its region, that number being the percentage of hen population within the region.

Actual figures were assigned to each region, taking into consideration the number of birds that would normally be slaughtered between August 15 and November 15, plus the additional birds that need to be slaughtered to bring production into line with the USDA guidelines.

Nationally, normal slaughter in the three-month period was projected at 331 million, with an

extra 144 million slaughter needed, bringing the total to 475 million or 3.7 million per week.

In the Northeast, this breaks down to a normal slaughter of 4,895,396 layers with an additional slaughter of 2,131,200 under the UEP program. This results in an overall slaughter of 450,507 birds per week during the 13-week period.

In the Southeast, the nation's largest egg production area, normal slaughter is set at 138 million with an extra slaughter of 6 million marking a total of 198 million or more than 15 million total per week for 13 weeks.

United Egg Producers will keep weekly totals by region and

will keep each regional manager advised as to the marketing in his region.

In addition to this action, UEP's Board of Directors has established and named a long-range planning committee to recommend programs to the board and to the membership. It was noted that the "Action Now" program was a short term program and probably of little value without long-range programs and goals.

The new committee is composed of Dean Olson, Chairman, Don Nicolaysen, Jerry Faulkner, Warren Garrard, Clyde Springer, Fred Adams, Jr., Jack Hayie, Don Honn, and Mike Huth.

Olson has called a meeting of

the committee during the latter part of August in Denver, Colorado, to begin work on a long-range program designed to follow the "Action Now" Program.

Some very optimistic reports were given as to the effects of the "Action Now" program. Although the directors felt that the original sell-off of old fowl was somewhat slower than anticipated, they expressed the feeling that a substantial sell-off would occur in the next few weeks.

From the reports given it appears that the August hatch will be down as much as 85 per cent in some states with the national hatch down in excess of 50 per cent.

The Satisfaction That Comes From Doing A Good Job Of Farming

It's a great feeling to know that you are the master of your farmlands . . . that when you treat your soil right, it will treat you right. Liming is one of the most important factors in keeping your soil in the highest productive range. By raising the pH from a level below 6.0 to 6.5 or higher, you can expect to harvest as much as 5 more bushels of corn per acre, with similar increases for all other forage and cash crops.
