Introducing . . . The B-305

Q: Is there any relationship between the now "World Famous" Babcock B-300 and the new B-305?

A: Yes, a very close relationship. Let's say, for sake of example, that four inbred lines called A, B, C and D are used to produce the B-300. We mate A and B together to get the female parent of both the B-300 and B-305. To produce the B-305, we then replace line C with line L on the male parent side. We, therefore, end up with 75% of the same make-up for the B-305 as the B-300.

Raising Baby Chicks and Started Pullets on Your Farm

Where Leukosis is a Problem?

We Recommend You Order
MUSSER'S M-327 CHICKS

Started and Matured Pullets and Yearling Hens and Breeding Cockerel

WHY? Because our breeding and our resistance program on our farm has given us three distinct controls over coccidiosis and leukosis.
