Raising Baby Chicks and Started Pullets on Your Farm

Where Leukosis is a Problem?

We Recommend You Order MUSSER'S M-327 CHICKS

Started and Matured Pullets and Yearling Hens and Breeding Cockerel

WHY? Because our breeding and our resistance program on our farm has given us three distinct controls over coccidiosis and leukosis.

Another World Famous White Egg Layer! The B-305

Q: How did the B-305 do in the USDA 2-Year Combined Summary of Random Sample Egg Production Tests for the years 1967-68 and 1969?

A: We are very proud to announce that the B-305 finished in second place for income over feed and chick cost The B-300 was in first place, however, the B-305 was only 2 cents behind This is a great tribute to the research ability of Babcock, for it is the first time any breeder has had two birds in first and second place.

Babcock Farms, Inc.
