Another World Famous White Egg Layer--- The B-305

Q: Do you have any commercial field data on the B-305?

A: Yes, we are beginning to collect excellent records on this bird. We have just received the records on one flock of 12,000 layers in production for 12 months, that showed excellent production with only 6.8% mortality for the total laying period. Please write, and we will be happy to send you production records that we have.

Where in the World is Babcock? . . .
Wherever eggs are produced at a profit!

Must Good Started Pullets Be Hauled 1000 Miles?

NO! You can get good started pullets that are grown much closer to you than that. Moyer's Chicks grow Kimber and Sex Sal pullets. The kind of pullets you will be happy to buy. Capacity is limited so contact us this week. With no obligation, we will be happy to explain our operation and prices.

Raising Baby Chicks and Started Pullets on Your Farm

Where Leukosis is a Problem?

We Recommend You Order MUSSER'S M-327 CHICKS

Started and Matured Pullets and Yearling Hens and Breeding Cockerel

WHY? Because our breeding and our resistance program on our farm has given us three distinct controls over coccidiosis and leukosis.
