

Pa. Poultry Processors Association Meets

The Pennsylvania Poultry Processors Association met December 9. President Gene Bailey presided over a group composed of 29 representing Processors members, 26 representing the Inspection Service, two from Pennsylvania State University, and one from the Pennsylvania Department of Agriculture.

A report was presented indicating that finances are favorable as the organization gets ready for the 1971 Farm Show Cases with fresh and further processed poultry will be on display.

All plants have received a letter about furnishing products for the show and all are urged to respond as quickly as possible.

President Bailey turned the meeting over to Dr. McNay to explain moisture requirements, testing, etc.

Publication 70-21 furnished all of the necessary information on moisture absorption and retention restrictions for poultry.

Secretary E. J. Lawless Jr. also reported the following

The new regulations go into effect January 4, 1971, with a two week grace period which extends complete compliance to January 16, 1971.

The 10 bird test will be continued but no action will be taken based on results during the two week period.

The plant is responsible for the washing, chilling and draining procedures, and must furnish scales, weights, tags, bands, etc., used in making tests.

The scales that are now in the plants will remain for some time and some provision may be made to release the scales for plant purchasing.

It is essential that scales be calibrated to 1/8 of an ounce. Inspection is responsible to conduct one or more tests daily and, if more than one class of poultry is run, one test must be made on each daily.

Inspection must advise management regarding the results of the test and maintain a complete file on all moisture tests.

Inspection must be certain

that the manager does not make intentional changes in procedures without giving previous notice. Inspection is obliged to allow management to make change for moisture control when an error is located.

A 50 bird test may be made to check moisture when a previous average was discovered on a 10 bird test.

When a 10 bird test indicates that there is too much moisture, the birds from that point on must be held until another test is made.

Unless a test is made on infected birds and found to comply, the birds must be held for 24 hours, and if a 50 bird test is made by management and requirements are met, the birds can be released. Birds that fail to meet requirements may be cut and then allowed to drain.

Management may make changes providing they make proposed change in writing, complete a CP-528 or conduct a 50 bird test for compliance.

York Imperial Is No. 1

York Imperial was the No. 1 apple variety in Pennsylvania this year, according to the State Crop Reporting Service.

The crop of 152 million pounds of York Imperials was the largest in the state's history and accounted for more than 28 per cent of Pennsylvania's crop.

Pennsylvania was also the nation's major producer of York Imperials, accounting for 43 per cent of the US total of this variety.

Golden Delicious ranked second in the state in production during 1970 and was followed by Stayman, Rome Beauty, Red Delicious, Jonathan and McIntosh.

480 CONSTRUCTION KING LOADER - BACKHOE

- Versatile utility loader-excavator handles a variety of jobs at lowest cost — built to Construction King standards.
- Low initial investment, low operating cost
- 2200 lb. loader lift capacity to full height. Power-linkage design, plus big hydraulics, provide 3500 lbs. breakout.
- 42° bucket rollback at 18" carry, 110° grading angle. Exceptional loading, leveling, and grade performance.
- High-production 12½' backhoe, reaches over 15' from swing pivot. Over 20,000 lb. pryout force.
- Powerful, high-speed cushioned boom swing. No-lag hydraulics, for continuous cycling power.
- Hydrostatic power steering for quick, effortless maneuvering. Less operator fatigue.
- 3-point hitch for choice of rear-mounted landscaper, scarifier, mower, scraper, rake, etc.
- Choice of trenching and bell-hole backhoe buckets.
