### BUX<sup>®</sup> MORE FARMERS USE IT THAN ANY OTHER ROOTWORM INSECTICIDE.

What makes BUX so special? A lot of things, including effective season-long control. Just a single application of BUX at planting time keeps corn standing tall right up to harvest. Besides that BUX offers several "extras" Extras no other rootworm insecticide can give you. It resists leaching in rainy weather. It's lower in toxicity than most other corn rootworm insecticides. You don't need special clothing or equipment. Just follow label directions. Corn treated with BUX can be fed to livestock. It won't bridge over in applicator hoppers or clog equipment. It doesn't have an objectionable odor like other insecticides. It's made with non-abrasive clay granules, so it's easy on equipment . . . making calibration easy too. So treat your corn to BUX. Before rootworms treat themselves to your corn.

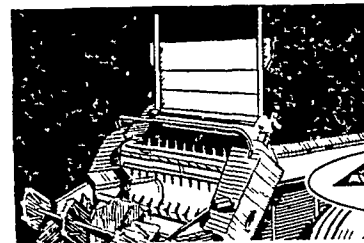

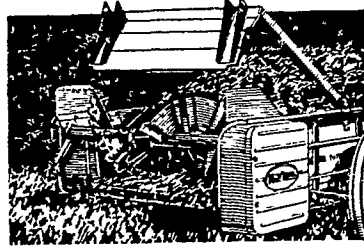

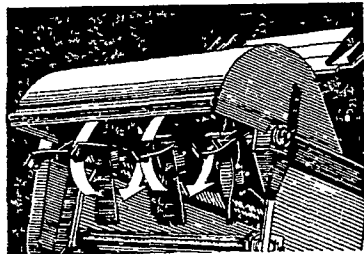

TM'S — Ortho, Chevron and Design helping the world grow better. Bux — Reg U S Pat Off on all chemicals read cautions, warnings and directions before use.

### Pa. November Milk Report

Milk production in Pennsylvania in November totaled 250 million quarts, about two million quarts less than in November 1969, according to the State Crop Reporting Service.

Total production for 1970, however, is expected to be about 15 per cent more than the 1969 volume.

The number of cows on Pennsylvania dairy farms in November was estimated at 708,000, down one thousand from the October total, and 7,000 fewer than at the beginning of the year.

Milk production per cow averaged 760 pounds, the same as in November 1969.

The Lord preserves the faithful.—(Psalms 31:23).

The way of the Lord is the way of peace, and comfort from sorrow. It is the way of joy, prosperity, overcoming. It leads to the land of prayer's fulfillment. The yearnings of our hearts find a true measure of contentment when we follow in the way of our Lord of love. In the secret depths of our being let us join in the Psalmist's song: "Be strong, and let your heart take courage."
