USDA Seeks Controls On Oils in Meat, Poultry

The US Department of Agriculture announced recently an extension of time, until Jan 11, 1971, for public comments on possible changes in inspection regulations to control the addition of water and oil base solutions into meat and poultry products

On Oct 7, USDA's Consumer and Marketing Service announced that it was considering the possibility of regulatory changes and requested comments on the scope of any formal proposal which might eventually be issued C&MS said the extension was being granted because of several requests for additional time

Consideration of changes in inspection regulations, C&MS said, was prompted by increased use of these water and oil base solutions

In meat products the solutions are added to help retain normal color, to distribute seasonings throughout the meat, and improve tenderness

In poultry products, C&MS said, the solutions are added to inhibit the development of muscle dryness during cooking and to facilitate wider dispersion of flavoring agents

Two copies of any comment should be sent to the Hearing Clerk, US Department of Agriculture, Washington, D C 20250 before Jan 11, 1971. 30 days after publication of this notice in the Federal Register on Dec 10 All comments will be available for public review in the Hearing Clerk's office The invitation to comment was originally published in the Federal Register on Oct 8

FRESH FEEDS

LIKE FEEDING YOUR HOGS AND CATTLE NEXT TO THE MILL!

Almost like having your own private mill right on the farm. For we aim to have our feed delivered to the farm and in the feeders within mere hours after it is made. We do all the work. Pelleted feeds, too. With all the fresh flavor locked in. Pellets that feed down easy in the feeders, that keep feed from blowing away, that hold down feed waste. Fresh pelleted complete feeds. There is a difference. Try us and see.
