

Holstein Tops 300,000

Lakefield Fobes Delight, 3232651, owned by Carnation Milk Farms Carnation, Washington, the third Registered Holstein in history to exceed 300,000 pounds of lifetime milk production, has died recently at 20 years and five months of age.

At her death, Delight had produced in 6,742 days of life, 304,064 pounds of milk, a 3.6 per cent butterfat test, and 10,987 pounds of butterfat.

Classified 92, 2E" she was sired by Lakefield Winterthur Victor Fobes, 1005816, 87, G.M. and was out of Minnow Creek Eden Delight 2494802. 92, the leading lifetime butterfat producer in the Holstein breed with 12,211 pounds of fat and 282,278 pounds of milk in 6,590 days of life.

On her way to becoming the third Registered Holstein to produce 300,000 pounds of milk, joining College Ormsby Burke and Zeldenrustontiac Korndyke, "Delight" produced her highest record at 7 years, 11 months of age, three-times-a-day milking, in 365 days, 28,546 pounds of milk, 3.9 per cent test, and 1,112 pounds of butterfat.

Staley Pledges NFO Action

President of the National Farmers Organization, Oren Lee Staley has declared that the "hog lift" demonstration by NFO hog producers on the East coast early in January was only a sample of things to come.

The farm leader from Rea, Missouri, stated that "the winter of 1971 will go down in history as the farmers' winter of discontent and action."

Staley said, "More American farmers than ever before are realizing that NFO is their only hope. Farmers backs are against the wall and the only way out of agriculture's economic crisis is through NFO collective bargaining programs that get down to the nitty-gritty of raising farm prices."

The militant farm leader recounted farmers grievances, saying

"Farmers must fight the monstrous food chains that have built monopolistic power that permits them in effect to dictate 15 cent hogs to the farmer while at the same time dictating \$1.00 pork chops to the housewife."

"Farmers must no longer tol-

erate fellow farmers being squeezed out while wondering how long before it's their turn to be pushed out of their homes and way of life into overcrowded cities because they cannot as individuals receive justice at the marketplace."

Staley then declared, "Farmers are ready to back up their demands by blocking production together and putting a price tag on it so they will become price-makers instead of price-takers. NFO will lead the fight and buyers who see the handwriting on the wall won't be caught without NFO contracts that will be filled by progressive farmers who are determined to price their products."

The NFO president concluded the challenge to those who buy from farmers, saying, "We are demanding economic justice for farmers and NFO is going to see the battle through!"

Swine Management

pings turn from pasty white to watery.

If the pigs are 60 pounds or up when moved into the finishing house, the farmer can get satisfactory results with an open fronted finishing building with a pit. This type of facility can give "pretty satisfactory" results at only about half the cost of a controlled environment building, he said.

"If the pig has a warm place to lie, he will be as efficient as in a controlled environment," according to Younkin.

But supplemental heat will be needed if the pig is under 60 pounds.

The meeting Monday was conducted by Max Smith, Lancaster County agricultural agent.

WHAT IS BUX® ?

Bux is a carbamate insecticide developed by Ortho for control of resistant and non-resistant corn rootworms.

WHY BUX IS BETTER!

Bux is the only corn rootworm insecticide that offers all the following advantages:

- Effective, season-long control with a single application no matter how early you plant, Bux stays active throughout the hatching and larval stages of rootworm development.
- Doesn't leave harmful residues
- Less hazardous to us. There's no need to wear special equipment such as a respirator or goggles, when using Bux.
- No objectionable odor
- Flows freely through application equipment
- Resists leeching in rainy weather
- Won't damage application equipment. Bux is formulated on non-abrasive clay granules. So there's no worry of tearing up your pesticide applicator.
- Recommended throughout corn belt. Bux is recommended by University Entomologists in all states where resistant rootworms are a problem.
