church one Sunday and the next week the other congregation used it.

They have a pavilion and cook house, a bandstand and all kinds of playground equipment. This year they are building an 8 foot addition to the cook house, redoing the bandstand and building more tables.

This project is still financed with soup sales. They have one each year in April and one in October. They cleared \$540 at the last one. They make 300 gallons each time and get 80 cents a quart. Richard Wanner and Rube Shelly make the soup which sells out in four hours time. People bring containers to put it in. Edna said the best customer she had bought \$15 worth of soup.

The ingredients they use for 300 gallons of soup is 900 pounds of chicken hens and 37 dozen eggs. They use 13 eggs and 12 cups of flour and salt to make rivels. To each 20 gallon kettle they use 50 pounds of chicken, 4 gallons of whole kernel corn, 2 gallons of crushed corn, handfuls of salt and a one dollar box of saffron. They also sell 110 pies, cakes, whoopy pies, pumpkin bread, fresh eggs, gladioli bulbs and pumpkins.

All the work at the grove is donated. It is used for reunions, church services, class meetings, picnics and is rented out to other groups besides the churches.

Mrs. Loose was the daughter of the late Mr. and Mrs. George L. Evans of Buckerville. Till

she was 14 years of age, she was raised on a 13 acre farm, where her mother and two children did the farming. She went to Fairview Elementary School and Ephrata High School.

Fairview School has a reunion every summer. Originally

it was held at the school and as many as 200 attended. Later it was held at the picnic grove at Penryn, but sometimes it has been held at Looses when weather was bad. Only a couple dozen attend it now.

Edna is a member of the Jerusalem UCC Church at Penryn, president of her Sunday School class and a member of the Ladies Guild.

The Satisfaction That Comes From Doing A Good Job Of Farming

It's a great feeling to know that you are the master of your farmlands . . . that when you treat your soil right, it will treat you right. Liming is one of the most important factors in keeping your soil in the highest productive range. By raising the pH from a level below 6.0 to 6.5 or higher, you can expect to harvest .8 more tons of alfalfa per acre, with similar increases for all other forage and cash crops.

All Nature Smiles

IN Spring nature casts aside the drab garb of winter, buds burst and spread fresh, vibrant color up and down the land. All nature smiles. In such a setting a paint-needy house looks drab and dreary.

A fresh coat of paint will give your house a "spring-like" appearance. It will smile, too.

Enriched Agrico puts money in corn

Corn gets a fast, early start with Agrico 8-32-16—an enriched formula of the essential plant foods to help corn grow hardy and healthy. This special analysis helps corn mature early and uniformly. Agrico fertilizer won't clog your ma-

chine or separate out, overfeed some spots while starving others. It is uniform and even flowing to produce consistent yield.

Your Agrico man has Agrico for Corn at the fast, convenient outlet near you.

First in Fertilizer because we offer more!
