nearby land is rented, presently totaling about 100 acres

Besides brother Steve, Sue has a sister Linda, 13, who will be a freshman at Elizabethtown High School this fall

Sue is looking forward to the state pageant coming up in September during the All-American show. On July 6 and 7, county winners from all over the state will spend two days in Harrisburg training for the state pageant.

At the pageant Tuesday evening, each of the seven contestants was introduced. They in-

troduced their parents Harry Kauffman, master of ceremonies and director of public relations for the Philadelphia Dairy Council, led each of them through a conversation on family, farm, education and the milk industry.

During the comments before the large group of local dairymen, Sue lauded milk as helping a girl's complexion and being the most complete food. She recommended that advertising of milk be geared more to youth.

She said she is "just a farm girl from Elizabethtown" who likes to farm because "there's always something to do. It keeps me out of trouble."

Judges were: Mrs. Alletta

Sue likes to ride her horse, Buck, on the farm.

Schadler, Lebanon County Extension Home Economist; Robert

and Herman Stebbins, farm program director of WSBA, York

princess committee chairman, was presented a gift by the contestants. Mrs. Carol Hess Weaver, 1966 pageant winner, was introduced

Can a 1971 farmer afford 1920 buildings?

The structures of the twenties (and others of even earlier times) handicap farmers more than they realize; barns too small for today's bigger cows and bigger herds; sheds that can't accommodate modern machinery; electrical, water, and waste-disposal systems badly overburdened.

Agway has erected more than 2,600 farm structures, worth more than \$26 million. Barns of all types, feed storage and handling systems, machinery and crop storage sheds; milkhouses and milk-handling systems—including sanitizing equipment. Trained Agway crews, under skilled supervision, handle the whole erection and installation contract.

Agway assumes total responsibility for labor and materials.

Whether you intend to modernize existing structures or build completely new facilities, it will pay you to have Agway's skilled planning service investigate your needs and make recommendations. There's no obligation.

Farmers Must Answer Survey To Keep Base

In order to maintain wheat allotment and corn base, farmers must respond to a survey currently underway, according to Miss Dorothy Neel, Lancaster County ASCS executive director.

Fred G Seldomridge, county ASC committee chairman, explained that the Agricultural Act of 1970 made changes in the law concerning farm wheat allotment and/or feed grain base.

To keep a wheat allotment or feed grain base it is necessary that the wheat, corn, and sorghum acreage grown on each farm operated be reported to the county ASCS office annually.

Postcards have been sent to farmers for this report. Enter the acreage of each crop planted for 1971 harvest in the appropriate space, farmers have been instructed.

Wheat, corn, and sorghum acreage will be used to determine future wheat allotments and feed grain bases. If no report is received or no crops are grown in 1971, wheat allotment and feed grain base will be reduced by 20 per cent next year.

If no report is received for three years, the law provides that allotment and base will be dropped from ASCS records.

"Your farm earned these crop allotments and bases. It is to your interest or a future owner's interest to maintain the records, although you are not participating at the present time," Seldomridge said.

All crop acreages requested on the card will be used to evaluate the effectiveness of the 1971 set-aside farm programs.
