Corn Blight Spreads, **But Impact Still Minor** Instances of Southern Corn

Leaf Blight infection have been

verified in about 422 counties in 26 States, according to the National Federal-State Informa-

This represents an increase of

Reports from most States emphasize that the overall infection

is still light, often occurring in

only a few fields within a county. The blight appears to be further developed in southern Il-

linois and southern Indiana than

in other areas Most of the new

counties reporting blight are in

Although field-to-field spread

of the disease is taking place to

a minor extent in some areas,

there is no widescale spread of

the blight. Most infection, plant

pathologists emphasize, has re-

sulted from diseased debris re-

maining from the 1970 crop, and

occasional crib shelling or corn

Apply lime often for best results

To keep your soil neutral, liming every 2 or 3

years is recommended, because of the new higher-analysis fertilizers being used today.

For good production next lactation,

FEED PURINA

As a dairyman, you know that good milk production

doesn't just happen. It's something you plan for by establishing a herd with the genetic potential for good production, then managing and feeding your cows so they'll produce up to their bred-in ability.

Many successful local dairymen also plan for good production with a proven program of dry cow feeding. They need Purina Dairy Conditioner, a research-proven ration to help give dry cows body condition

Purina Dairy Conditioner is an extra-palatable 121/2

percent protein ration. It's fortified with vitamins A and D plus extra phosphorus to help guard against milk

Purina Dairy Conditioner is low-cost, too, because the

amounts you feed depend on your cows' condition and

on the quality of the roughages you feed. For example,

a cow dried off in good condition being fed high-quality roughages would require less Dairy Conditioner than

a cow in only fair condition being fed fair quality

Drop in soon and get your free copy of the Purina Dry Cow Program folder. We'll be glad

to show you how Purina Dairy Conditioner can help you prepare your dry cows for good pro-

they need for good production after they freshen.

DAIRY CONDITION

Pledge was-led by Vickie Heck-

Roll call was taken by Gwen Hosler and Jeannie Kahler. Brenda Sensenig collected dues.

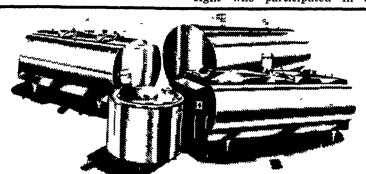

Songs were led by Denise Esbenshade. Brenda Sensenig demonstrated

how to put a knot in thread.

The club was divided into sewing groups to start projects News Reporter, Debbie Becker
