 Special packs including 1¾-2, 3½ pound sizes TFEWR.

Eastern Pa. and N. J.

Wednesday, Sept. 1
 Prices generally held unchanged on light type hens though a weak undertone prevailed as offerings increased Demand fair with most processors working near capacity Advance bookings heavy Offerings of heavy type hens generally short of a fair but limited interest. Prices paid at farm: Light type hens 4½-7 mostly 6½-7 in Pennsylvania mostly 6-6½ in New Jersey. Heavy type hens: TFEWR.

Local Grain

Thursday, September 2

These prices are made up of the average prices quoted by six participating local feed and grain concerns. It should be noted, however, that not every dealer handles each commodity. All prices are per bushel, except for ear corn which is per ton.

The average local grain prices quoted Thursday, September 2, are as follows:

	Bid*	Offered*
Far Corn	43 00	48 33
Shelled Corn	1 43	1 62
Oats (local)	69	79
Barley	1 01	1 21
Wheat	1 41	1 59

*Bid is the price the dealer will buy from the farmer delivered to the mill. Offered is the price the dealer will sell for at his mill.

Green Dragon Hay Market

Friday, August 27

Six loads hay, including Two loads Alfalfa, 38 00-42 00; load Timothy, 30.50; load Clover, 38-50; two loads Mixed hay, 31 50 and 33.00.

1972 Wheat Program Outlined

Domestic wheat allotments for 1972 were mailed to 3,673 farms in the County on August 31.

These allotments do not limit the acreage of wheat that may be grown They are established to determine the acreage that must be set-aside and the payments that can be earned under the 1972 Wheat Program. The 1972 domestic wheat allotment for Lancaster County is 12,135 acres, according to Miss Dorothy Neel, ASCS executive director.

Basically, the wheat program is similar to 1971. There is no limit on acreage. To participate a farmer must set-aside 83 per cent of the farm domestic allotment, and maintain the Conserving Base established for the farm

About 850 acres of wheat allotment will be lost in the county because farmers did not plant 90 per cent of the allotment in 1971, or else did not report the acreage to the office For 1971, corn or grain sorghum in excess of 50 per cent of the feed grain base, could be considered wheat acreage for history purposes For 1972, barley is considered a feed grain

Blight Reported

(Continued from Page 1)

ceptible corn shows some level of infection

Maryland; Delaware: Blight increasing rapidly in both States Some fields in Delaware completely destroyed

North Carolina, South Carolina: Corn crop generally good. SCLB-susceptible corn badly damaged, except where it was harvested for silage. North Carolina reports considerable stalk and husk infection, with the disease penetrating through the husk and kernels into the cob in many instances

The Blight Information Center, established by the US Department of Agriculture in cooperation with State Agricultural Experiment Stations and State Extension Services, coordinates blight information nationally

and can be substituted for wheat acreage. Also, acreage planted to soybeans will be considered planted to wheat or feed grain, if needed for history preservation.

Allotments were reduced 20 per cent from 1971 on those farms that received "zero" as planted or considered planted to wheat in 1971. After three years of "zero" planting, the wheat allotment will be dropped.

Basic provisions for proven wheat yields are still in effect A farmer may elect to establish a yield based on actual production, rather than the one established by the County Committee on a judgment basis. The

Masonic Homes Cows Are Cited

A junior three-year old registered Ayrshire cow named Masonic Homes Lo Betsy has completed an official milk production record of 17,200 pounds, with 642 pounds of butterfat on twice daily milking for 305-day DHIR testing period, announces the Ayrshire Breeders' Association.

Also in the Masonic Homes Farm herd of Elizabethtown are the following cows and their records:

Meredith Sun Peg, an eight year old cow, 16,910 pounds of milk, 676 pounds of butterfat; Masonic Homes Ninah B. a junior yearling three year old, 16,430

Wednesday, September 1

Prices trended lower on mediums Undertone continues weak and unsettled although there was a faint glimmer of hope noticeable locally as fancy large and extra large supplies moved into a more favorable supply-demand balance. However, large, not of top fancy quality, are liberal and trade indicates strong possibility of arrivals from future board deliveries. Mediums and smalls still at burdensome proportions despite attractive pricing of mediums at retail levels in this morning news media and scheduling of more early next week. Wholesale movement locally is still slow and unaggressive while carton orders varied from slow to occasionally good.

base period for establishing 1972 wheat yields is 1968, 1969 and 1970.

To prove the yield, a farmer must have planted and harvested wheat acreage in each of these three years, and be able to provide reliable proof of production on the harvested acres. A written request must be filed by September 15.

The signup period for the 1972 wheat program will be February 28 through April 7, 1972. All farm operators who wish to participate in the program must come to the county ASCS office at that time and sign their intentions to participate.

pounds milk, 632 pounds butterfat; Masonic Homes Hi Pat, senior yearling three year old, 15,950 pounds milk, 628 pounds butterfat.

Masonic Homes Hianna, junior yearling two year old, 14,370 pounds milk, 550 pounds butterfat; Wauwatosa's Flashy Gertie, junior yearling three year old, 14,200 pounds milk, 553 pounds butterfat; Masonic Homes Miss Prim, junior yearling two year old, 13,690 pounds milk, 540 pounds butterfat, and Masonic Homes Royal Harriett, senior yearling four year old, 13,300 pounds milk, 611 pounds butterfat.
