

Farm Women Societies

Society 14

Farm Women Society 14 met Wednesday, September 8 at the home of Mrs. Paul Longenecker, Strasburg RD1. Serving as co-hostesses were Mrs. Warren Hershey, Mrs. Melvin Stoltzfus, and Mrs. Ira Rutt.

Devotions were in charge of Mrs. Warren Hershey. Members responded to roll call by recalling school day memories.

Activity for the day was a miscellaneous sale.

Under new business, it was announced that in 1972 the meetings will be held in the evenings.

Next meeting will be held at the home of Mrs. Murl Clark, Strasburg, at 1:30 p.m. Wednesday, October 13, when Society 14 will entertain Society 22 and County officers.

The program will be given by Sally Ann Brenneman. Hostesses for the day will be Mrs. Jason Mellinger, Mrs. Ellis Esbenshade, Mrs. Arthur Groff, Mrs. Christian Landis, Mrs. Merle LeFevre, Mrs. Laverne Mylin and Mrs. Ira Kreider.

Society 26

Farm Women Society 26 met at the Pepsi Cola Building, Man-

heim Pike, with Mrs. Amos Landis as hostess. Assisting was Mrs. Harold Esbenshade.

Devotions were led by Mrs. Howard Spiling. The program featured Dr. Gerald Chapman from the Cleft Palate Clinic. He spoke and showed slides on the work at the Clinic.

A short business meeting was conducted by the president, Mrs. Robert Summy. Members voted \$100 to the Cleft Palate Clinic.

The next meeting will be at the home of Mrs. Harold Musser, Elizabethtown RD3, at 7:30 p.m. on Sept. 23. Joann Hess will be the guest speaker.

Farm Women Calendar

- Saturday, September 11**
 1:30 p.m.—Farm Women Society 1, home of Stauffer sisters, Lititz RD3.
 1:30 p.m.—Farm Women Society 2 meets
 6:30 p.m.—Farm Women Society 25 anniversary banquet, Highville Fire Hall.
 3 p.m.—Farm Women Society 19 square dance, farm of Mr.

Women's Event Slated in October

"The Widening World of Women" is the theme of a seminar for women in southeastern Pennsylvania to be held at King of Prussia October 19 and 20, 1971.

Choice, challenge and change will be explored during the program which features outstanding speakers as well as workshops for discussions.

Dr. Ham Ginott and Judge Juanita Kidd Stout are keynote speakers for the Tuesday program; Dr. William Smith, Penn State University will close the program. Wednesday Workshops will be held each day.

For further information call or write June Wilke, Extension Home Economist, 402 North Wing, Courthouse, West Chester Pa. Phone is 696-3500.

Registrations are due September 15. After this date a late registration fee will be charged. The program is open to all women regardless of their participation in the Extension program.

and Mrs. Richard Nissley, Bainbridge RD1

Saturday, September 18
 2 p.m.—Farm Women Society 3, Mrs. Earl Latshaw, hostess
 2 p.m.—Farm Women Society 8, Chiques United Methodist Church, Mount Joy RD2

Ladies, Have You Heard?

By Doris Thomas, Extension Home Economist

New Non-Cling Nylons

Manmade fibers with built-in easy care signaled a new era in washability, from wearables to walkables, clothing to carpets. But the modern day miracles also introduced a problem—static.

This electrifying force cause material to creep and cling and may give off unintended and not romantically induced sparks when one person touches another after walking across certain carpets. Many aspects of the static problem have been solved by industry.

Now it looks as if MOST of the creep, cling and tingle will be gone from wonderfully durable washable nylon. Major fiber companies are not making "anti-stats." It's not that the hair-raising static is gone, but simply dissipated more quickly as happens with natural fibers.

But there are other bonuses. The new nylons absorb moisture faster, making clothing feel cooler and more comfortable. Anti-static properties also increase soil resistance and soil releasing characteristics. Whiter whites and brighter colors are the order of the day.

First introduced in women's intimate apparel, the "anti-stats" graduated to pantyhose and men's socks and are now moving into the outerwear field.

Conventional nylon will be "old-fashioned" before so very long it seems. To the consumer, the chemistry behind it all is unimportant, but the results are certain to be appreciated.

To a lesser degree, polyesters and acrylics, also wonderful washables, are static prone. It's encouraging to note that these synthetics are also under close scrutiny by industry laboratories to eliminate the negative—static—and increase the positive—easy washability.

Many Uses Of Glycerine
 Glycerine, a clear, colorless, syrupy liquid, is a substance derived from animal and vegetable fats.

Commercially, millions of pounds of glycerine a year are used in products bought for personal and household use. Dentifrices and skin lotions are among the more important.

It has long been used in the food field as well, since it holds moisture in products that would otherwise dry out. Processors add glycerine derivatives to improve such foods as confectionery, gelatins, and frozen desserts.

And pharmaceuticals, for internal and external use, may contain glycerine.

There are also many conveniences that arise from its availability both on the kitchen shelf and in the medicine cabinet. As a convenient household helper, keep a bottle of glycerine handy. Here are just a few suggestions for its use.

Kitchen utensils such as rotary egg beaters, meat choppers and others with cogs that require oiling, should be lubricated with a few drops of glycerine instead of machine oil. If you use oil there is always a danger of its contaminating the food, but glycerine is harmless, and it gives off no unpleasant flavor.

A teaspoon or two of glycerine added to your regular recipe for blended or boiled icing will help keep it from drying out.

After cleaning a bathroom mirror, rub it with glycerine to leave a microscopically thin film so your mirror won't steam from the hot water of your shower.
