**Freeze Milk for Trips**

When you travel or camp and want fresh milk available, you can freeze it for later use, says Mrs. Ruth J. Buck, Penn State University Extension foods and nutrition specialist.

Many families prefer whole, fluid milk for drinking, even though evaporated and dry milk is easy to store, carry along and use.

Mrs. Buck suggests freezing the milk in the original milk

cartons. Then use the frozen milk as all or part of the ice in the cooler. Or store the frozen cartons in the freezing compartments of trailer or camper refrigerators.

Defrost milk in time for the next meal and shake well before using.

Don't worry if the containers bulge slightly. There is enough headspace so the seal won't break. Remember never to freeze milk in glass bottles.

Expect a slight flavor change, although there is no change in the nutritional value of frozen milk. For anyone sensitive to any flavor change, mix the milk with flavorings or use it in various types of milk shakes.

Because milk is so important for all age groups, freezing fresh whole milk can be one way to carry it along on camp-outs and trips. See that your youngsters get three cups a day. Cheese, ice cream, and foods made with milk supply part of the daily calcium, protein and riboflavin needs.

**DUNCAN CORN CRIB**

Rods Slide Quickly  
Into Place... Lock Panels  
Into Unbroken Cylinder Of  
Galvanized Mesh!

High pitch roof  
approx 45 pitch  
24 gauge roof panels.

NOW, you can own a permanent, lifetime, all steel mesh corn crib for less than the cost of many temporary cribs... have all the strength and anti-rust characteristics the galvanized mesh can have. Using the Interlocking joint panel connections you quickly hook together and lock with rods... creating an unbroken cylinder of 2 or 5-gauge steel mesh with the ability to stand pressures and strains far in excess of any which may be put upon it under normal use.

The simple "J-bolt" method of attaching the steep roof to the mesh uses the inherent strength of each to reinforce the other. A generous 6 inches of overhang has been provided for greater protection. Interlocking sheets of heavy gauge metal give the "Rod-Lok" Corn Crib roof strength to stand the heaviest snowfall. Top cap and half panel on roof removable for easy filling. Large slat door opening. Slat not furnished for door.

the heaviest snowfall. Top cap and half panel on roof removable for easy filling. Large slat door opening. Slat not furnished for door.

**Strength, Performance, Dependability. You've got 'em all  
with VAN DALE'S NEW TRAVELING BUNK FEEDER.**

Van Dale's SCF-1400 is the traveling feeder to put you on the track to faster, more profitable operations. Automatically, it delivers up to 40 tons of silage per hour to bunks on a single chain, continuous "shuttle" service.

Feeder trough chain is No. 67 pin-tie (12,500 lb. strength) and drive chain is C-550 steel (average top strength of 10,000 lbs.). Interlocking, snap-together galvanized metal components reduce erection time as much as 50%. Suspended or floor-mounted, rails are mounted with Van Dale's exclusive clip-on brackets to provide extra-rigid support. Unit adapts to any feeding need in-barn or out-of-doors.
