

Plans Discussed by Farm Women Board

Members of the Lancaster County Farm Women executive board met Tuesday at the home of Mrs. Dale Hiestand, Bambridge RD1. Mrs. Harry Shonk served as cohostess.

Announcement was made that the Spring Rally of Farm Women will be held May 10 at Seven Springs Resort, Somerset County. A turkey dinner will be served at the affair. Those planning to attend should contact Mrs. Kenneth Ross, Fridens RD2, before April 8.

In other business, members

were reminded that all Farm Women Societies which have not as yet sent their donations for the Farm and Home Center kitchen shower should do so before February 7. They were also reminded that county dues should be paid before April.

Mrs. Dale Hiestand will serve as program committee chairman for the county convention which will be held November 4. She will be assisted by Mrs. Florence Kreider, Mrs. Harry Shonk, Mrs. Evelyn Hess and Mrs. Frances Souder.

Three organizations were proposed as possible county projects for next year. They are LARCH, Goodwill Industries and the proposed Conestoga Cottage for Girls.

Societies desiring to sponsor refreshment stands at the antique auction to be held at the Farm and Home Center on Memorial Day are asked to contact Mrs. Thomas Erb III, Latitz.

Hostesses for the next executive board meeting which will be held April 4 are Mrs. J. Clayton Charles and Mrs. Flossie Garber.

BEEF UP

As a beef operator you're interested in maximizing your profit picture. You're looking for new ideas, new methods and new innovations that will help "beef up" your profit. Here's a program worth looking into. It's called "Van Dale Systems Feeding." It starts with maximizing your production of total digestible nutrients with increased haylage and silage. This permits the best use of your land and cattle coupled with a fully mechanized feeding system. Van Dale has the equipment and know-how for maximizing profits through mechanized feeding.

FORAGE BOXES

So let's bring it in from the field with a Van Dale Forage Box. These rugged built units are equipped with exclusive auger-type "beaters" that deliver all kinds of forage under all kinds of conditions. No clogging at the blower, as the forage is metered between the augers —not over the top!

SILAGE DISTRIBUTORS

Van Dale distributors insure even silage distribution throughout the silo for a maximum fill. The 1640 Power-Fil's unique revolving deflector plate diverts the explosive force of incoming material and spreads it evenly in a continuous sweeping pattern to the wall. The 538 operates in an elliptical motion, directing forage to the outside walls of the silo. Varied spout rotation speed allows for even fills.

SILO UNLOADERS

There's a Van Dale unloader for every feeding application. These high performance twin-auger units can handle virtually any silage or haylage under the most adverse conditions . . . frozen, gummy or what have you, and do it fast. The 1230 has been customer-certified in the field to outperform, and outlast any make its size. For hard work in smaller silos there's the 1020F. The Industrial is built for silos from 20 to 40 feet in diameter and has a capacity up to 40 tons per hour.

BULK STORAGE BINS

Supplementary feeds are easily handled with Van Dale's bulk storage feed bins. The Super Stores are available in 4 1/2 or 7 1/2 ton sizes. These units are fiberglass constructed. They won't rust, dent, corrode or absorb heat from the sun.

CONVEYORS

Whether straight-out, incline, auger or chain, Van Dale conveyors fit most any automated feeding system. The SCC 1400 Chain Conveyor is Van Dale's highest capacity conveyor. It handles all rations—safely. The CT 200 and 300 auger type conveyors are adaptable to any feeding system. They're tough, efficient, easy to install and economically priced.

BUNK FEEDERS

Van Dale has a bunk feeder for every operation. The SCF 1400 Traveling Bunk Feeder is a single chain unit that will carry and feed virtually everything. The Mammoth 14 Multi-Feeder is an auger type designed especially for multi-lot operations. The 934 and 1234 Auger Bunk Feeders are the sturdiest, smoothest operating, lowest cost feeders ever produced. Then, there's the stainless steel Shaker Feeder. A combination feeder and bunk designed for single-lot operations.

Van Dale Systems Feeding comes down to one word . . . efficiency. Van Dale offers various models and sizes of feeding equipment to most efficiently match the needs of every feedlot layout . . . old or new, large or small. Check with your Van Dale dealer to see what you need to maximize your profits. And ask him about Van Dale's new agri-leasing program.
