

## Dairy Processing Conference Planned

A conference for dairy processing, quality control and sales personnel has been scheduled for April 10-13 at Pennsylvania State University, says N. Alan Bair, associate Lancaster County ag agent.

Primary emphasis is on the flavor and shelf life of fluid dairy products. Processing procedures, cleaning and sanitizing, waste disposal and sanitary regulations will also be covered.

Part of one day will be spent on

a field trip to a dairy plant which also makes cultured products. The remaining time will be spent in the classroom and laboratory discussing quality and related topics. The conference will be conducted by the Department of Dairy Science staff.

Preregistration is necessary prior to March 30 as facilities are

Lancaster Farming, Saturday, February 12, 1972—5

limited to 40 persons. However, at least 15 persons must preregister or the conference will be canceled.

For a copy of the program and a preregistration form contact: Agricultural Conference Coordinator, Room 410, J. O. Keller Building, Pennsylvania State

University, University Park, Pa. 16802.

# BELT® BASIC SOIL INSECTICIDE OF THE '70s. NEW IMPROVED GRANULES GUARANTEED TO FLOW FREELY.

## GUARANTEE

EFFECTIVE INSECT CONTROL  
AND FREE FLOW GRANULES

Should Belt 33G fail to effectively control the soil insects listed on the label, when used specifically according to use directions shown, or should Belt 33G not flow adequately through a standard spreader that has been properly adjusted, maintained, and in good working condition, Velsicol will refund an equivalent amount of Belt 33G insecticide to that used on acreage where Belt performance was not satisfactory (verified by paid invoice showing price and quantity purchased) if the following conditions are met:

- Grower has completed and returned the guarantee registration card available at his dealer's within 45 days of Belt 33G purchase.
- Notice of dissatisfaction of product performance and handling covered by this guarantee must be submitted in writing within 60 days of application.
- A qualified Velsicol representative must be assured that the purchaser used Belt 33G according to label directions. The Velsicol representative must have the opportunity to observe insect control or handling performance to determine whether or not Belt provided economic control or was applied with properly maintained equipment.

**IMPORTANT:** Refund is limited to acreage on which Belt performance or handling was not satisfactory. Be sure to fill out and mail the registration card, available at your chemicals dealer, to verify your purchase of Belt 33G soil insecticide.

The broad-spectrum soil insecticide, Belt, is growing rapidly in popularity. Controls the widest range of soil insects that attack corn.

Belt protects corn till harvest, regardless of weather. Little hazard to feed, water, wildlife, when used properly, Belt is comparatively low-toxic. Its active ingredient is covered by a tolerance on corn of 0.3 ppm.

Velsicol guarantees flowability of Belt 33.3G granules. Easy to handle, it's applied and incorporated at or prior to planting.

In "no-till" planting, a once-over application proves especially effective and economical. Belt stays in the soil . . . and works!

The emulsifiable concentrate, Belt 72ECF, is also available if you prefer liquid application.

You can have confidence in Belt. It's chlordane at its best, for economical, broad-spectrum control. At your ag chem dealer's.
