

Chester Extension Meetings Planned

Two meetings on corn, soybeans and grain sorghums will be conducted by the Chester County Cooperative Extension service on Wednesday, February 23.

Beginning at 1 p.m. at the Russellville Grange Hall,

Russellville, the program will include "Growing Corn in 1972" by Joseph McGahen, Penn State agronomist, and "Can Soybeans Replace Corn as a Cash Crop? - as a Feed Crop?" by William Mitchell, University of Delaware agronomist.

The evening program will be held at 7:30 p.m. at the Owen J. Roberts High School vo ag room. Included in the program will be "Growing Corn in 1972" by Joseph McGahen, and "Can Grain Sorghums Replace Corn as a Cash Crop? - as a Feed Crop?" by James Haldeman, Berks County agricultural agent.

Lancaster Farming, Saturday, February 19, 1972—5

New Cooperators Named

The Lancaster County Soil and Water Conservation District

The "1971 Pennsylvania Commercial Hybrid Corn Tests" and the "1972 Agronomy Guide" can be obtained at the meeting or from the Extension office.

announces the following list of new cooperators:

Robert R. Buch, East Hempfield Township, 30 acres; Loran Brinton, Little Britain Township, 130 acres; Millersville Boro, Millersville; Ivan N. Good, Rapho Township, 113 acres.

NEW COMBINATIONS ON CORN CONTROL HARD-TO-KILL BROADLEAF WEEDS AND GRASSES OTHERS MISS

BANVEL® + LASSO®

PRE-EMERGE TANK-MIX ON CORN*

BANVEL + atrazine

EARLY POST-EMERGENCE TANK-MIX ON CORN

How to beat young, tough broadleaves, vines, weed grasses before they damage your corn?

If you know where and what your weed problem is, the new tank-mix combination, Banvel + Lasso, goes down just after planting, before corn or weeds emerge . . . timed to destroy weed and grass seedlings, when corn cannot compete successfully with weeds.

Depend on this combination like insurance coverage. No harm to corn. No need to incorporate. No carryover. No residue problems.

Banvel + atrazine tank mix can do the broad-spectrum weed control job on weeds resistant to 2,4-D and not adequately controlled by atrazine alone.

Allows you first to make sure how much and what

kind of a weed problem you have. Spray 3 to 15 days after corn emerges, when grasses are less than two inches.

No brittleness caused in corn. Ideal for narrow-row, minimum-tillage programs. One early-post treatment gives season-long control. So, usually no need to cultivate.

See your dealer or custom applicator about Banvel + Lasso or Banvel + atrazine combinations that work before weeds hurt.

*Banvel + Lasso label registration pending Lasso is a registered trademark of Monsanto Company.
