RAISING BABY CHICKS AND STARTED PULLETS ON YOUR FARM WHERE LEUCOCIS IS A PROBLEM?

**WE RECOMMEND YOU ORDER
MUSSEY'S M-327 CHICKS**

STARTED AND MATURED PULLETS AND YEARLING HENS AND BREEDING COCKEREL.

WHY?

Because our breeding program on our farm has been very effective in breeding resistance to Leucosis and Marek's disease

We can offer you M 327 chicks vaccinated or not vaccinated for Marek's disease and you can expect excellent results.

By having built this resistance to Marek's and Leucosis during the earlier years, we have been able to improve our egg size, our egg production and what it takes to produce a chick that will develop into a pullet capable of showing a profit even in a year which we are experiencing at present.
