

The Manheim Central FFA Chapter elected officers to serve for the oncoming year at a meeting this week. Richard Kauffman, seated, was elected as president of the Chapter. Others who will serve are: standing, left to right, Donald Wenger,

treasurer; Tina Haldeman, Chapter Sweetheart; John Miller, secretary; Roy Sauder, sentinel; Mervin Bruckhart, vice-president; Dwight Martin, reporter, and Bob Hershey, chaplain.

Dailey Elected Chairman of Federal Farm Credit Board

Millard F. Dailey, a grain farmer from Red Lake Falls, Minnesota, was elected chairman of the Federal Farm Credit Board at its organizational meeting last week.

Dailey replaces Jonathan Davis, Sterling Junction, Mass., who was named by the Board as vice chairman for the coming year

Reelected as secretary to the Board was Jon F. Greeneisen, director of information for the Farm Credit Administration.

The 13-member board sets national policies for the cooperative Farm Credit System through which its farmer-owners borrow more than \$14 billion annually. The System consists of 12 Federal Land Banks and 594

Federal Land Bank Associations, 12 Federal Intermediate Credit Banks and 440 Production Credit Associations and 13 Banks for Cooperatives.

Does that favorite recipe of your grandmother's call for sour milk? Just substitute the same amount of today's buttermilk right from the carton, or pour one tablespoon of lemon juice or vinegar in a measuring cup and add enough milk to make one cup. Let stand five minutes before using.

"The cow is of the bovine ilk; One end moo, the other milk," wrote poet Ogden Nash. But now an English inventor has built a non-bovine specimen, a new mechanical cow of plastic tubing and angle irons with huge jaws fed by a conveyor belt. The jaws munch grass, clover and waste

cabbage leaves which then enter a centrifuge stomach which spins and separates the fiber from the liquid. The liquid is then treated with chemicals and electric currents to eliminate mineral discolorations. Even if it succeeds, somehow the end result won't be the same without bossy.

TIRED!!

Are you just a little tired of milk replacers that won't mix well, that won't stay in suspension, that settle out?

Read what Paul Miller, respected Holstein breeder of Linglestown RD4, Pa. has to say . . .

"I like Pioneer Vig-R-Calf because it starts my calves off fast and keeps scours at a minimum."

And Mrs. Earl Hadley, Bedford, Penna. . .

"Having used other milk replacers, found Vig-R-Calf to be more like cow's milk, in both building better calves, and eliminating other troubles."

And Donald Walker of Berlin, Pa. . . .

"I have fed another make of calf starter and milk replacer for a good many years, but I found that Pioneer Vig-R-Calf and calf starter, much more appealing, and the calves do much better on it."

You can get performance like this, with a product that many users don't mix at all. Just put the powder in the bucket and pour the water on top. Try it for yourself and see the difference.

International® 225 Hayswather

Top quality performance is quick and easy with the International 225 Hayswather. Just match these big capacity features with your toughest crops, the International 225 Hayswather does the rest—quickly, easily, and always at top performance:

- Easy adjustable windrow forming shields or take them off and lay a wide swath.
- Big, all-condition flotation tires.
- Fully adjustable seat—comfortable ride.
- Exclusive torsion bar float—fast, safe and responsive.
- Wide 10-ft tilt adjustable platform.
- Four bat, low profile reel with breakover bar.
- Conditioner placed a long distance from knife—won't pull up crop before it is cut

THERE'S A LITTLE PART OF VAN DALE IN EVERY UNLOADER...

BUT STILL ONLY ONE THAT'S GOT IT ALL TOGETHER.

In 1950, we introduced the most efficient silo unloader to the market. Simple, but efficient.

We've changed during the last 21 years. Added self-cleaning, wide throat impellers for tough to handle haylage. Dual, no-plug augers for smooth silage movement. Dependable, weather-sealed electrical systems to prevent failures. And numerous other performance-features "firsts."

If you look around, you'll find a little part of VAN DALE in just about every unloader . . .

But only Van Dale sells it all together.

MODEL 1020 F 10-16 Ft. Diameter Silos—delivery to 15 tons/hr.

MODEL 1230 12-30 Ft. Diameter Silos—delivery to 25 tons/hr.

INDUSTRIAL Up to 40 Ft. Diameter Silos—delivery to 40 tons/hr.
