New Director Appointed for Bureau of Foods and Chemistry

A new director of the Department of Agriculture's Bureau of Foods and Chemistry has been appointed, it was announced by Secretary McHale.

Mrs. Jane Alexander was

appointed effective April 5. Mrs. Alexander is a Dillsburg attorney and former state representative.

The Bureau of Foods and Chemistry is responsible for inspecting all facilities dealing in

food products, ranging from restaurants to bottling plants.

Mrs. Alexander said the bureau is currently involved in making its inspections program uniform so that paperwork and functions can become more streamlined.

NEW COMBINATIONS ON CORN CONTROL HARD-TO-KILL BROADLEAF WEEDS AND GRASSES OTHERS MISS

BANVEL® + LASSO®

PRE-EMERGE TANK-MIX ON CORN*

BANVEL + atrazine

EARLY POST-EMERGENCE TANK-MIX ON CORN

How to beat young, tough broadleaves, vines, weed grasses before they damage your corn?

If you know where and what your weed problem is, the new tank-mix combination, Banvel + Lasso, goes down just after planting, before corn or weeds emerge . . . timed to destroy weed and grass seedlings, when corn cannot compete successfully with weeds.

Depend on this combination like insurance coverage. No harm to corn. No need to incorporate. No carryover. No residue problems.

Banvel + atrazine tank mix can do the broad-spectrum weed control job on weeds resistant to 2,4-D and not adequately controlled by atrazine alone.

Allows you first to make sure how much and what

kind of a weed problem you have. Spray 3 to 15 days after corn emerges, when grasses are less than two inches.

No brittleness caused in corn. Ideal for narrow-row, minimum-tillage programs. One early-post treatment gives season-long control. So, usually no need to cultivate.

See your dealer or custom applicator about Banvel + Lasso or Banvel + atrazine combinations that work before weeds hurt.

*Banvel + Lasso label registration pending. Lasso is a registered trademark of Monsanto Company
