

# Berks County FFA Officers

The Berks County FFA officers for the 1972-73 school year were elected at a recent County FFA meeting at Oley Valley High School

New officers were chosen on the basis of their knowledge of the FFA and parliamentary procedure, their farming programs, and their par-

ticipation in FFA contests and activities. The 1971-72 officers quizzed the officer candidates in each area and then rated the candidates on their responses.

Chosen as president of the Berks County FFA was Ronald Myers, a junior at Conrad Weiser High School. Besides being especially active in local Chapter activities, he has been quite active in County activities, having participated in the following:

Parliamentary procedure contest, 1970; public speaking contest, second place in 1970 and first place in 1971; dairy judging, 1970; first place tractor driver in Berks County in 1970.

Nevin Mast, president-elect of the Twin Valley Chapter, was chosen as vice-president. He has

served as vice-president of the Twin Valley Chapter and has participated in the following FFA contests:

Parliamentary procedure, 1970 and 1971; public speaking, second place in Berks County in 1972;

first place dairy judge in 1971, and land judging in 1971.

Other officers chosen were: Robert Gehman, Governor Mifflin Chapter, secretary; Marlin Dietrich, Kutztown Chapter; Brian Hower, Tulpehocken, reporter; Robert Tercha, Brandywine Chapter, sentinel; Roy Zuber, Oley, chaplain, and Jacob Leiby, Hamburg, corresponding secretary.

\*Reg. trademark of Pioneer Hi-Bred International, Inc.,  
Des Moines, Iowa, U.S.A.

### "Leveling" with Labeling

In cooperation with national meat and food industry organizations, more and more meat retailers throughout the country are adopting uniform meat identification labeling programs. Designed to provide meaningful specific information for consumers, the voluntary meat industry program identifies each cut as to type of meat (beef, pork, veal, lamb), the primal cut from which it comes (chuck, loin, round, etc) and the retail name of the cut (pot-roast, steak, chop, etc) plus recommended cooking methods. Example: "Beef Chuck Pot-Roast (Braise)." In addition, carcass identification charts for each type of meat would be on display showing where each primal and retail cut is located

## GET MAXIMUM EFFICIENCY WITH LIQUID SUPPLEMENTS

Containing DES (diethylstilbestrol!)

Mol-Mix is the ideal supplement for feedlot cattle. Developed to economically balance grain and roughages for maximum feed conversion, top gains, and high dressing percentages, coupled with low production costs

### MOL-MIX CONTAINS:

- Cane molasses
- Liquid urea
- Distillers solubles
- Condensed fermented corn extractives
- Ammonium polyphosphate
- Phosphoric acid
- Vitamins and trace minerals
- Plus unidentified factors

Easier to absorb than solid supplements. Easier to handle. Go with Mol-Mix, The Liquid Leader . . . Now Available with DiBESTrol for even greater efficiency.

## NEW INTERNATIONAL 990 MOWER CONDITIONER

Greater capacity...  
Operates with less power...  
Requires less adjustment...  
than any other mower conditioner

Operate in heavy hay or sudax a gear faster. Full-width conditioning rolls eliminate dead spots that waste power. And you'll find there's no power loss due to side draft on hillsides or on the level.

You get increased capacity because larger diameter 44-inch reel is less affected by changing crop conditions. And, the unique position of the reel bats holds the crop flat so it feeds through the conditioning rolls, without hesitation. What's more, controlled platform float and self-compensating roll pressure lets you move from field to field, crop to crop and rarely ever readjust the 990.
