

What's New?

Vertical Bale Elevator

A new top drive a new double chain lift, a new bale kicker and a new automatic adjustment that adapts to any weight or size of square bale are improvements available in a new vertical bale elevator announced by Allied

Farm Equipment.

The top drive efficiently pulls bales up without extra gearboxes or linkages that require maintenance or repair. The double chain lift grabs and securely holds bales from opposite sides to avoid tearing and broken

strings.

The vertical section also automatically adjusts to any weight or size of square bale through a parallel arm system that solves many bale handling problems.

At the top end of the elevator, a new bale kicker, a powered chain, positively turns and starts bales on top the mow section.

The entire system requires no complicated adjustments.

The new Allied Vertical can be used with Allied's Inclined Feeder Section that swings up out of the way or can be easily removed. The entire system attaches to most barns and is available in lengths from 10 feet to over 30 feet.

Mildew Preventative

A "clean" fungicide, Mildew-B-Gone prevents mildew spores from reproducing on virtually any surface found on farms or in homes - wood, concrete, masonry, glass, leather, cloth, tile, canvas.

Mildew-B-Gone works in silos, barns, lockers, greenhouses, basements, bathrooms, clothes closets, boat lockers; directly on clothing, luggage, furniture, shoes, plywood paneling, sports gear and equipment. It is even effective when mixed with paint.

Unlike most mildew inhibitors requiring weekly applications, Mildew-B-Gone provides up to one year protection with one fine spray treatment, as verified by laboratory test. Not only a preventative, it sanitizes and deodorizes to eliminate musty and mildewy odors. No sunning or airing is necessary since Mildew-B-Gone works regardless of temperature and humidity.

A product for the times, Mildew-B-Gone meets current ecological standards; is completely biodegradable and har-

mless to pets. Its non-aerosol formula will not pollute the atmosphere. It is non-toxic, non-inflammable, non-irritating and carries the U.S. Department of Agriculture registration number as an approved fungicide.

Mildew-B-Gone can be sprayed, brushed or wiped on, is packaged in 16-ounce and 32-ounce refill bottles with spray applicators available. Manufacture and unconditionally guaranteed by IBR, Inc., 462 Penn Street, Yeadon, Pa. 19050.

New Electric Chain Saw for Farm Use

A new electric chain saw designed to handle many jobs around the farm has been introduced by McCulloch Corporation.

The new Mini-Mac Electric chain saw weighs under eight

pounds without cutting attachments and comes with a factory installed 10-inch bar.

The rugged and powerful Mini-Mac Electric is a precision wood cutting tool and is particularly useful for general maintenance work, pruning trees, and cutting firewood.

The smooth cutting and smooth running electric chain saw is easy to use. Just plug it in, and it's ready to go.

For safety's sake, a thumb activated safety latch prevents accidental triggering. There is also a visual chain oil supply.

The saw runs off of household current. A 2,000-watt or larger generator will run the saw where electricity is not available.

The double insulated saw can use a standard two-wire extension cord.

MR. FARMER!

Are you aware of the latest law concerning Farm Employees? As of May 1, 1972 Pennsylvania Law says that if you have an employee who works more than 20 hours a week or your payroll exceeds \$150.00 you are then subject to the law covering Workman Compensation.

This agency will be glad to discuss this with you. Contact Paul I. Sheaffer or J. Wilbur Sollenberger.

THERE'S A LITTLE PART OF VAN DALE IN EVERY UNLOADER...

BUT STILL ONLY ONE THAT'S GOT IT ALL TOGETHER.

In 1950, we introduced the most efficient silo unloader to the market. Simple, but efficient.

We've changed during the last 21 years. Added self-cleaning, wide throat impellers for tough to handle haylage. Dual, no-plug augers for smooth silage movement. Dependable, weather-sealed electrical systems to prevent failures. And numerous other performance-features "firsts."

If you look around, you'll find a little part of VAN DALE in just about every unloader...

But only Van Dale sells it all together.

MODEL 1020 F 10-16 Ft. Diameter Silos—delivery to 15 tons/hr.

MODEL 1230 12-30 Ft. Diameter Silos—delivery to 25 tons/hr.

INDUSTRIAL Up to 40 Ft. Diameter Silos—delivery to 40 tons/hr.
