Delmarva

Wednesday, June 21

Ready-to-cook movement spotty ranging light to occasionally fairly good. Slaughter schedules generally well maintained at most plants. Advance interest fairly good with early trading noted at generally 1 cent higher than this week's levels. Less than trucklot prices held unchanged on both Plant and U.S. Grade A. Live supplies fully adequate for needs. Undertone firm. Negotiated trucklot prices 2-3 pound ready-to-cook broiler-fryers for delivery next week:

U.S. Grade A -
Plant Grade 29½-30
Pool trucklot prices for Thursday arrival:
U.S. Grade A 29½-32½ M 29½-30
Plant Grade 28½-30½ M 28½-29

If you like to knit socks, knit the toe with a different color yarn. When a hole appears, it is quite simple to ravel these stitches and re-knit a new toe instead of darning.

sustain top production with the **BABCOCK B-300**

Keeping production up... costs down... is the profit key in poultry operations. And more and more records on commercial flocks of Babcock B-300's... "The Businessman's Bird"... show sustained production of top quality eggs... often with an additional 20 to 30 eggs per bird housed over other strains. Come in... look at the records and the B-300... "The Businessman's Bird".

Peeweese	13	14	14	14	14
BROWN					
Fcy. Large	33½	33½	34	34	34
Mediums					Unquoted
Pullets					Unquoted
Peeweese					Unquoted
Standards	29	29	29	29	29
Checks	16	16	16	16	16

Long tone - Position is irregular and showing ample supplies in most areas for an unusually disappointing demand.

New York Eggs

Wednesday, June 21

Prices unchanged on large and mediums, fractionally higher on smalls. Street trading activity light and unaggressive on large and mediums, fair on extra large with smalls improved under better export call. Supplies of jumbos short, extra large about adequate with some tie in sales of large and mediums. Arrivals light as most dealers attempting to work out stocks on hand with occasional lot of good quality large forced for sale. Movement into retail channels is fair but limited to day to day needs, however deliveries of extra large are shorted slightly.

Eastern Pa. and N.J.

Wednesday, June 21

Prices held unchanged on light type hens. Demand fairly good as call for finished product improved. New farm offerings reported lighter than past several weeks as producers hold for further production at improved egg prices. Offerings of heavy type hens ample for a limited demand. Prices paid at farm: Light type hens 5-8 mostly 7¼-8 in Pa., mostly 7-7½ in N.J. Heavy type hens 13-13½.

Regional Hay Prices

Monday, June 19

(All hay No. 2 and better, prices paid by dealers at the farm price per ton.)

Little old crop hay moving. New crop mostly steady, moving slow due to wet weather.

New Crop Alfalfa	20.00-32.00
New Crop Mixed hay	20.00-25.00
New Crop Timothy hay	18.00-20.00
Straw	20.00-28.00
New Mulch	12.00-18.00
Old Mulch	17.00-20.00

FFA Activities Week, Penn State University, June 28-30.

DIFOLATAN® 4 FLOWABLE

The leading flowable fungicide made to fight potato blight.

DIFOLATAN gives excellent protection against both early and late blight. And is particularly effective against tuber rot.

DIFOLATAN sticks to the plant, resists weathering from rain or sprinkle irrigation. That means you can maintain your schedule without worrying about the effects of weather or irrigation.

Protection against tuber rot is outstanding. When you put potatoes in storage, you'll never know how well you did in the blight fight until you've shipped the last of them. Fields may look reasonably healthy before harvest, but if you put infected tubers into storage, you can find yourself with a costly, heavy cull out of late blight tuber rot infection.

DIFOLATAN works to give you greater yields of healthy potatoes. And—because it's flowable—it does that even better.

Another good thing about the fastest selling potato fungicide. It works on cucumbers, melons, and tomatoes, too.
