

What's New?

Interior Finish Product Improves Sanitation

Sanitary practices and the dairy industry have long been partners in the effort to provide healthful foods to the nation. Now a St. Paul Corporation has joined the industry in its efforts to maintain its strict sanitary practices.

Conwed has introduced a new product, Conwed Farmpanel, which offers the industry a dairy interior which provides a white poly film surface which can be hosed down under pressure and sprayed with disinfectants. Conwed says the 4 foot x 8 foot panels would be especially beneficial in maintaining standards of high cleanliness required in milking operations due to cleaning-in-place features. The panels are easily installed on both the ceilings and walls.

Conwed Farmpanel is available in three types: Super

Call Us Now

To serve the Lancaster County farm community better, we maintain two phone numbers and advertisers can also reach us through 626-2191 (ask for Lancaster Farming) and avoid a toll call from the Akron, Ephrata and Manheim exchanges.

Strength Farmpanel, Fired Protection Farmpanel, and Standard Farmpanel.

Each of the three products resist acids and alkalines and is inert to mold and fungi. In addition, the products are an effective vapor barrier, provide an insulation value and reflect light from its white surface to improve interior lighting conditions.

Rat Controller

The same kind of rat killer (an anti-coagulant formula) that has been successfully used by professional exterminators, as well as municipal and public health officials for rat control programs within our cities is now being offered to farmers and poultry raisers by McCoy's Chemical Co., Cleveland, Ohio.

McCoy's Weather Proof Rat Killer Blocks are paraffin-based permitting their use outdoors, even in wet or damp areas. McCoy's will not sour, spoil or mildew due to dampness as is the case with grain (meal) or pellet rat baits under similar damp conditions. Containing Warfarin as an active ingredient, McCoy's Rat Killer requires no pre-baiting and there is no tolerance build-up or rejection by the rats. Also included in the bait is a variety of ingredients that are tastetemp-

Poultry Awards Presented to Seven County FFA Members

A Garden Spot FFA student has been named "Poultry Man of the Year" and six other FFA youths received "Poultry Man Excellent Achievement Awards" presented recently by Victor F. Weaver, Inc.

Named "Poultry Man of the Year" was Michael Martin, a junior at Garden Spot High School. Michael is the son of Mr. and Mrs. Robert E. Martin, New Holland RD1. He received a \$200 cash prize.

Receiving "Poultry Man Excellent Achievement Awards" were: Robert Gruber, son of Mr. and Mrs. Elmer Gruber, Bainbridge RD1, Elizabethtown High School; Donald Wenger, son of Mr. and Mrs. Richard Wenger, Manheim RD2, Manheim Central; Roy Fasnacht, son of Mr. and Mrs. Roy S. Fasnacht, Reinholds RD1, Ephrata High School; James Charles, son of Mr. and Mrs. Roy H. Charles, Lancaster RD2, Penn Manor High School; Nelson Martin, son

of Mr. and Mrs. Clyde W. Martin, East Earl RD1, Garden Spot High School; Rodney E. Unger, son of Mr. Mrs. Harry R. Unger, Nottingham RD2, Solanco High School.

The awards are part of an annual FFA Scholarship award presented to outstanding students in the field of poultry. Victor F. Weaver, Inc., established the scholarship award several years ago to stimulate a continuing interest and involvement in the poultry industry. The scholarship is available to students in Lancaster, Berks and Chester Counties who are FFA members. Applicants are judged on their involvement in personal and family enterprises, scholastic

achievements, FFA, school and community leadership and an essay.

Peach Crop Forecast

The 1972 Pennsylvania peach crop is forecast at 70 million pounds based on June 1 conditions. This would be one-third less than the estimated 105 million pounds harvested last year. Winter injury caused considerable damage to the crop, most noticeable on lower branches. Scattered frost and sub-freezing temperatures during bud and blooming stages caused additional damage.

Is your farm really worth as little as you think?

Last year, thousands of farmers who *thought* they were covered suddenly took a financial beating when disaster like fire or storm struck their homes. Why?

Because the replacement value of homes and barns has gone up over 33% in the last five years alone. And during the same time, costs of furnishings, clothing, tools and equipment have soared.

So, chances are, your farm is worth a lot more than you think it is—*and more than your insurance coverage says it is.*

If you haven't recently figured the value of your farm and personal possessions, you owe it to yourself to do so. It's easy.

Just call one of the Agway General Field Counselors listed below. He will be in touch with you quickly, to help you determine the present replacement value of your farm and your possessions.

The time to find out is now. Before something happens.

So don't take chances. Call today. No obligation, of course.
