

**New Discovery Is Said to Assist Debilitated Horses**

A new long acting tissue-building agent for treating debilitated horses, is being introduced nationally to the veterinary medical profession by the Animal Health Division of E. R. Squibb & Sons, Inc.

Debilitation can be caused

by many things: overwork, overexertion, excessive hauling, as a result of disease, surgery, traumatic injury, or any combination of these.

The treatment is indicated as supportive therapy in treating debilitated horses when the debility is due to overwork or overexertion, and as adjunctive therapy for diseases, surgical cases.

**Board Meets**

A board of directors meeting for the Lancaster County Holstein Club was held last Friday at the Farm and Home Center.

President Elam Bollinger reported that a tour from New York will be visiting the county on August 14. Bollinger said that most families for this tour have already been arranged, but that anyone interested in hosting future tours could contact him or any one of the directors.

The county's Holstein sales representatives reported that a shipment of heifers was being assembled at the Black and White Farm for export to Spain. They said that foreign countries were very interested in Lancaster County cattle. Farmers who'd like to export cattle were invited to contact Jay Landis or Nathan Stoltzfus.

Melvin Eby, chairman of the youth committee, told the directors that his committee is looking for a July or August calf to be given to an FFA member at the Solanco Fair during the county FFA contest.

The board voted full support for Clarence Stauffer to continue as a state director for the Holstein Association.

Publicity director Ken Rutt reported that a newsletter on club activities will be mailed to all members in September.
