USDA Adopts Twice Weekly Egg Reports

The U.S. Department of Agriculture will mail egg market

news information twice weekly instead of daily from several locations, USDA has announced. The change will take place in locations where egg market news reports are published separately—in some locations egg market news is included in combined daily reports on eggs, poultry, dairy products, and other products. There will be no change in the issuance of these combined reports. The change to mailing reports twice weekly (Tuesdays and Fridays) will occur in Newark, N.J.; Chicago, Ill.; Atlanta, Ga.; and Jackson, Miss.

New York Eggs

Tuesday, November 21
 Market about steady. Local wholesale demand is slower with sales generally of a small lot nature. Distributors are lightly supplied on most grades however, offerings of large and occasionally mediums are adequate. Small are short for a spotty demand, extra large are fully adequate to ample. Undertone continues nervous an spotty lighter sales develop for next week based on market values to be determined.

Live supplies adequate though weights often lighter than desired in some quarters while increasing in others where slaughter has been curtailed for several days. Undertone firm. Negotiated trucklot prices 2-3 lb. ready-to-cook broiler-fryers for delivery next week: U.S. Grade A 29; Plant Grade 28-28½. Pool Trucklot prices for Friday arrival: U.S. Grade A 28½-32½ Mostly 29; Plant Grade 27½-30½ Mostly 26.

The twice weekly mailings, which are expected to bring about a reduction in the operating cost of the market news service, reflect an expected trend in the egg industry away from daily price negotiation toward once or twice a week sales, and come at the recommendation of an industry study group. The changes were proposed in the Federal Register Sept. 9.
