Why there's less to fix when you grind and mix with a BRADY® Hydra-Mill®

A Brady Hydra-Mill has fewer wearing
parts than any other leading grinder-
mixer on the market today. It's as
plain as that!

Check the chart and count the number
of wearing parts on a Brady 1050 or 750.
Then compare the total with other makes.
You'll find dozens fewer on a Brady.

You see, all Brady grinder-mixers have
completely self-contained hydraulic
systems that power the feeder and
discharge augers. No need for trouble-
some bevel gears and sprockets.

What's more, Brady hydraulic motors
are guaranteed for three full years
under normal use and maintenance.

But you get more than low upkeep with a Brady. You get infinitely
variable hydraulic control to match your feeder auger speed to
available tractor horsepower for maximum grinding efficiency.
You grind more bushels per hour with less horsepower.

Choose from four models to fit your
needs. Brady 1050 with time-saving
150-bushel tank; Brady 750 with
84-bushel tank; and the Brady 1055
and 755 with high-capacity blowers
for extra hay handling capacity
and silo filling.
