

Quarryville Bank Announces Moves

Amos B. Myers

Ronald L. Erb

Three promotions and an increase in bank earnings exceeding all other years were announced during the annual stockholders meeting of Farmers National Bank of Quarryville.

Robert K. Bruce was promoted from vice president and cashier to executive vice president and chief executive officer. Amos B. Myers, former assistant cashier, was made vice president and manager of the bank's soon-to-be-built Penn Hill branch. And Ronald L. Erb was advanced from head teller to cashier.

The bank's total assets in 1972 increased from \$12,390,000 to \$14,802,000, an increase of 20 percent. Total deposits grew from \$11,232,000, in 1971, to \$13,543,000 in 1972, another 20 percent increase.

The net profit per share of common stock, after taxes, went

up from the \$5.59 of 1971 to \$7.05 in 1972, an increase of 26 percent. And the dividends for stockholders raised from \$2.00 per share to \$2.25.

After completing one year in its new building, the bank has also announced the building of its first branch office at Penn Hill. Groundbreaking for that office is scheduled for March.

Chairs For The Elderly

If you're getting a chair for an elderly person, Extension specialists at The Pennsylvania State University remind you to make sure it gives good body support for lower back and neck for long periods of time. Chairs should fit the person and not cut off circulation when both feet are flat on the floor. The chair arms should extend far enough forward to allow leverage when a person is sitting down or getting up.

Agri-Newsreel Available For Farm Group Shows

Sperry New Holland has released a new 21-minute color film, "1971 Agri-Newsreel" for use by farm organizations, youth groups, television stations and others who are interested in modern agriculture.

The seven-segment motion picture was filmed by Sperry New Holland's photographic staff during extensive travels in North America. Included are stories of a husband and wife who farm a 2,100 acre island in Lake Ontario, doing all the farm work themselves and fighting off coyotes in the winter, the FHA's Farm Family of the Year at home in Arkansas and visiting Washington and President Nixon, modern cowboys at work in British Columbia, and a modern-day haymarket at New Holland, Pa.

Also in the film is a story of the development of Mexico's dairy industry filmed in the LaGuna district, a remote farming

community in Alberta where rain has forced the farmers to seek new methods of harvesting hay crops; and an Ohio alfalfa pelleting plant that works around the clock during the summer.

Prints of the 1973 Agri-Newsreel are available on loan through New Holland dealers, branch offices or from the public relations department at Sperry New Holland, New Holland, Pa 17557. Schedule films well in advance of the date you want to use them.

Gettysburg Choir Slates Concert

The Gettysburg College Choir, conducted by Prof. Parker B. Wagnild, will give a concert on Sunday, Feb. 18, at 3:30 p.m. in the Trinity Lutheran Church, 29 South Duke St., Lancaster. The public is invited.

Why your next grinder-mixer should be a BRADY® hydraulic

It's the most efficient way to grind and mix your rations — that's why.

A Brady Hydra-Mill® has a self-contained hydraulic system to power the feeding and unloading augers — it's not dependent on tractor hydraulics.

With infinitely variable controls, you match feed rate to tractor power — grind more with less fuel and less time.

There's less upkeep, too. Fact is, a Brady has dozens fewer wearing parts than any other leading grinder-mixer. And only Brady guarantees hydraulic motors for three full years!

Brady's unique mixer auger design and steeper tank sides assure uniform mixing of every batch.

Faster unloading, too, with smooth hydraulic power. No sharp bends to force feed around. Exclusive "flat top" discharge auger design moves materials others can't.

Check 'em out — Brady 1050 with 150-bushel tank; 84-bu. model 750; and blower-equipped models 1055 and 755.
