

"They made a dairy pellet just for ME!"

Pennfield's wide choice of dairy pellets means that there's one especially blended for ANY dairy feeding program.

There is a 14 percent pellet to use if your herd is on a high legume roughage program. The 16 percent pellet helps your production when you're feeding equal amounts of corn and legumes. A high level corn silage program has best results with our 20 percent dairy pellets. If you're feeding a high moisture corn (ear or shelled) and corn silage, we recommend a 26 percent pellet.

Therefore, dairy pellets, besides helping you to maximum milk production, are economical, easy to handle, flow freely and are blended so that every pellet has the same ingredients and uniform quality.

NOW. Pennfield is offering the new Econo 16 percent dairy pellet and Econo 20 percent pellet - both with non-protein nitrogen. And they are also fortified as all Pennfield dairy pellets are.

Call a Pennfield Dairy Specialist today and discuss your complete dairy feeding program and learn more of the money saving advantages of the new Econo line.
