Our schools planned a terrific program for the high school pupils during the spring vacation. It is called "Quest" and allows them to pick and choose from dozens of trips to foreign countries, big cities or just camping and hiking in a southern state. Many joined a special interest group right here in the local area.

My daughter went to New York City. But, she almost missed the bus. We set two alarm clocks for five o'clock and neither one rang.

When I finally awakened by a calf bawling at six o'clock we zipped into clothes and dashed to Lancaster. Thank goodness, they had trouble stacking the luggage!

She came back saying what many before her have said — "it's a wonderful place to visit but I wouldn't want to live there"

Our registered Irish Setter had pups. However, they are not purebred. She is tied to her doghouse but other neighbors let their dogs run free and so

I don't know who enjoys the little ones more — the children or

## Fix-It Tip

Picking up from last week, the doorbell transformer will be fastened to the ceiling of the basement somewhere near the fuse-box. The primary terminals will have regular house wiring attached. Stay clear of these.

The secondary terminals will have thin bell wire attached to them. You can check these, and only these, with the blade of your screwdriver. A tiny spark when you touch the blade across both terminals indicates the transformer is O.K.

The bell itself could be causing trouble. Connections may be loose or contacts dirty. You may find broken parts. If you cannot clean or repair the bell, replace it. If the trouble is not with the bell, check the wiring for breaks.

I. The hard part will be giving them up as we know two dogs are enough to buy dog feed for continually

We all like to keep in touch with what is happening out there in the world beyond our own doorstep. Some people read the newspapers, some listen to the radio or watch television.

I've been to a variety of gatherings lately. Some, like the combined children's choirs at a World Day of Prayer, are programs dealing with drugs in our schools and they tend to shake us up. Spend a day mending and sewing in a big hospital and you can't help but realize that it is a world apart from our everyday lives.

But then we attend a Circle meeting with other housewives and gain a sense of contentment again

## Which Bug is the Termite?

The top one, the bottom bug is a flying ant. Notice its narrow waist. The termite has a broad waist. They're quite different, actually. If you have termites or suspect them in your home, call us.
