**POST-EMERGENCE APPLICATION IN  
 FIELD CORN GETS TO THE ROOT OF YOUR TOUGH  
 BROADLEAF WEED PROBLEM**

**HOW  
 BANVEL  
 TRANSLOCATES**

Your corn crop is well along. But tough, deep-rooted weeds threaten to take over. The earlier you spray Banvel, the better, preferably before hot, humid weather.

Even though you spray over the tops of corn, normally no brittleness develops. If you see velvetleaf or pigweed, a lower rate of Banvel mixed with 2,4-D will give most effective control.

Banvel works! For one simple reason. Banvel translocates. Absorbed by leaves, stems, roots, Banvel moves with plant fluids from leaf tip to root tip. Destroys as it goes. So, no regrowth.

In permanent pasture, Banvel gives you easy control of more than 40 of the most common weeds, including wild garlic, weed brush and weed trees.

Cost of Banvel? Up to \$1.90 per acre broadcast in corn. Ask your dealer or custom sprayer for full information.
