

Growers in Pennsylvania and the DelMarVa need weed control alternatives.

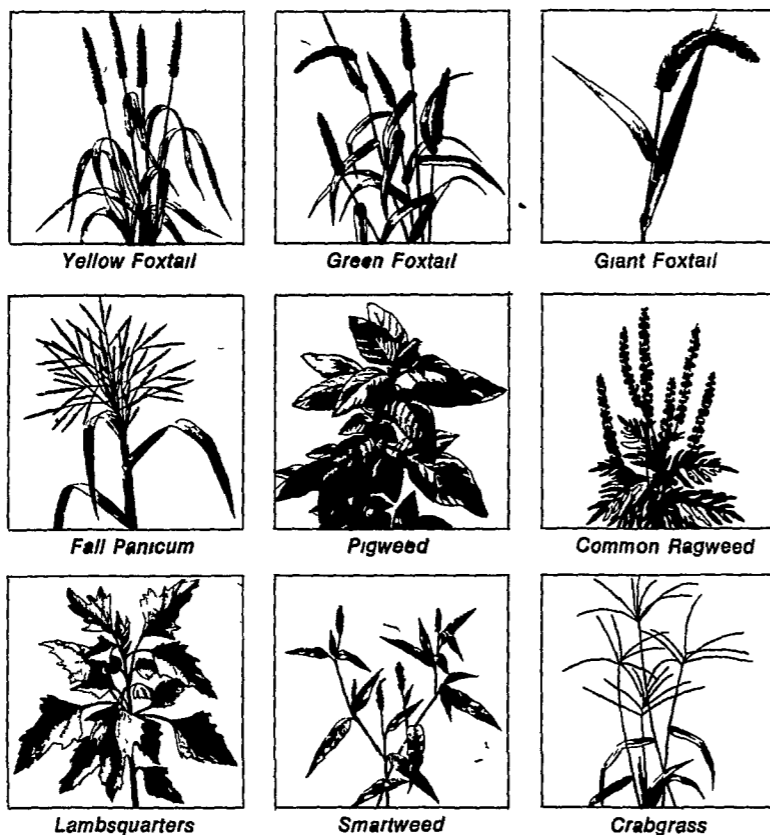

In corn or soybeans if you've got:

Use Lasso® by itself—liquid or granules. Lasso controls these annual grasses, broadleaf weed and more . . . with no carryover to harm following crops.

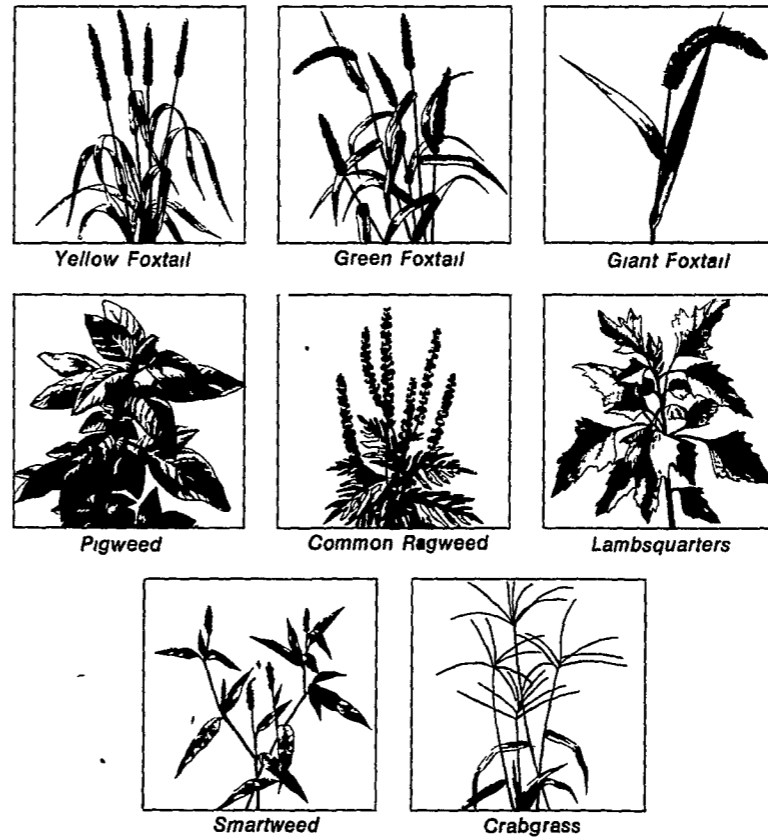

In corn if you've got:

Use Lasso plus atrazine tank mix. Lasso plus atrazine gives you broad spectrum control of the above annual grasses and weeds and you minimize carryover.

In soybeans if you've got:

Use Lasso plus Lorox* tank mix. Lasso plus Lorox goes on preemergence to control these broadleaves and annual grasses. Both of these herbicides in one tank mix, one trip through the field and your herbicides are there to take care of the weeds before they emerge.

Start with Lasso® . . . design a weed control program that fits your specific needs.

LASSO®
