What's new in
herbicides?

AAtrex 4L.
It pours.

New AAtrex 4L is the brand of atrazine that pours. This special liquified product controls most annual grass and broadleaf weeds in corn and sorghum right up to harvest just like AAtrex wettable powder.

But with AAtrex 4L there's no premixing. You simply shake and pour it directly into the tank. And apply in a minimum of 10 gallons of water per acre.

Easier handling. A minimum of agitation. And less chance of nozzle and screen plugging. That's AAtrex 4L. And we have it! In 1 gal. and 5 gal. containers. If you prefer, we'll apply it for you.
