## Southern Herds Visited on Chester Holstein Tour

The Chester County Holstein **Breeders Association annual** tour was held March 22 and 23. The tour group visited dairy herds in Maryland and the Virginias.

Farms visited included C.E. lager and Sons. Manle lawn Farm of Fulton, Md., top herd in Maryland with 140 lactations averaging 18,327 pounds of milk, 625 pounds of fat; Kingstead Farm, a 140-cow herd averaging 14,249 pounds milk, 549 pounds fat, a herd with a dozen cows contract moted to hull studs:

LeRoy Savage of Boyds, Md., a herd featuring 50 daughters of Paclamar Astronaut; Robert and Mary Poole, a small herd with 13 daughters of Ivanhoe Star and 10 daughters of Whirlhill Kingpin; Renn Remsburg's Brooklodge Farms Jefferson, Md., a herd

pounds milk and 650 pounds fat, with daughters of Elevation and Merry King. Other farms visited were those

of Pete Walker of Shenandoah Junction, W. Va., a herd of "Kansas Burkes" Russell Wachter's Clover'. Farm, Keymar, Md., with 86 cows having a B.A.A. of 106 per cent; Round Oak Farm, Purcellville, Va., a 100-cow herd with daughters of Elevation, Fond Matt and Defiance.

Bill Harrison's Farm at Leesburg, Va., a herd average of

with records averaging 16,000 16,000 pounds milk and a B.A.A. of 104 per cent, and John Rinehart's farm, Littleston, Pa., a herd stressing cow families with high production per cow and a well planned merchandising program.

> This year's tour visited some of the top herds in Maryland and the Virginias featuring a variety of management, feeding, and breeding programs. This cross section of dairy farming practices proved to be a very educational tour for all those who attended.

(

The Round Oak Farm at Purcellville, Va., was one of many farms visited during the

Chester County Holstein Breeders annual tour recently.

This group of Chester County dairy farmers left the milking chores to the hired men as they toured dairy facilities, part of a

two-day tour by the Chester County Holstein Breeders.

If you hear a steady thumping noise while driving, and can't find the cause, one of your tires may be severely underinflated, possibly the

versatility. The saddle is bolted to the frame and carries a 200 or 300 gallon Aluminum, Fiberglas, Coated Steel, or Poly tank, Adjustable wheels make it possible to vary row widths from 54" to 80". Flotation wheels are standard in 14" and 15" with 6" widths. The parking stand is standard. The floating boom is unique in design as it remains level when being used on rough terrain. The booms offered on this machine handle most chemicals. Complete your machine by choosing from various pumps to meet your own specific needs.
