Probably the last Potato Farm Dispersal to be held in New York State this spring! Plan on attending this sale to buy good used equipment. We must start promptly at 10:00 A.M.

Paes Calls

(Continued From Page 33) Paes has been county chairman since September 1971, when he was elected to fill the unexpired term of K.L. Shirk, who resigned. In May 1972, he was elected to his first two-year term.

He was elected by the Republican advisory committee as its choice to succeed Dombach as county commissioner, winning the recommendation over 12 other candidates by capturing 47 of the 52 votes cast on the first ballot. In assuming his new office, Paes has achieved one of the ambitions of his father, the late William E. Paes, chief clerk to the county commissioners for many years.

Saying that he enjoys county government, Paes called it one of the governments "closest to the people."

A taxpayer is a person who doesn't have to pass a civil service exam to work for the government.—Lois W. Matson, The Kiester (Minn.) Courier.

"Nothing seems to make a tack sharper than stocking feet."—Mayo G. Wood, the Wellington (Ohio) Enterprise.

PSU Readies for Little International Livestock Exposition

The singing of hair clippers, the clanking of sheep shears, and the splashing of soapy water will soon break the usual calmness of the livestock barns at The Pennsylvania State University. Such will be the activity of well over 100 students preparing their animals for the 56th Little International Livestock Exposition to be held April 28th at the Campus Ice Pavilion. The show is sponsored by the Penn State chapter of the National Block and Bridle Club.

The faculty advisor, Glenn R. Kean, estimates that students from several colleges of the University compete in the Exposition each year. In addition to agriculture, student showmen are mostly majoring in liberal arts, education, human development, science, business administration, engineering and health, physical education, and recreation. This year over 150 animals have been selected by students.

This year 1917 Peter B. MacKenzie, a former superintendent of livestock at the University, founded the Exposition. Among its purposes was to provide students with an opportunity to gain experience in handling, fitting, and showing four species of livestock. Since the Department of Animal Science furnishes purebred livestock including beef cattle, horses, sheep, and swine, the show is an opportunity to develop student-faculty relations. Four judges have been selected

Four judges have been selected to evaluate the exhibiters on their fitting and showing abilities. Swine judge will be Donald P. Fowler, associate county agent of Northampton county. David Flynn from Bellefonte, will serve as the horse judge. Judging sheep will be Clair W. Zerby from Knoxville, Pa. Beef judge will be Gene Hitchcock, manager of Jen-Car Farms of Monktow, Md.

The 1973 show has been dedicated to Ward Studebaker, horse herdsman at the University, selected by the club for his contribtuion to the field of agriculture. Mr. Studebaker serves as an instructor in many of the horse related classes and the Horseshoeing Short Course in the summer. Whether it be as a herdsman or an instructor, Mr. Studebaker is always willing to be of assistance to the students. Dr William A. Garrett, professor of nutrition and environmental studies from the Department of Animal Science, University of California, is being honored as this year's Distinguished Alumni of the Animal Science Department. A 1950 graduate from Penn State, Dr. Garrett was selected for his outstanding work in the field of forage

by PETER G. HAMMOND Executive Director, National Coordinating Council on Drug Education

Most drug abuse education programs do not have a passing grade. Basic fundamentals of pharmacology are consistently ignored For example, existing drug abuse education materials do not acknowledge the dose-response curve of all drugs. This simply means that the effects of a drug depend on how much is taken Children die every year from too much aspirin At least 3,000 people die every year from too many barbituates. One guarter of all hospital admissions are a result of too much of a particular drug. The "too much" varies from person to person, which raises the main point - no generalization's should be made about drug effects. For example, to call marijuana a hallucinogenic or narcotic as we do in our education literature and programs is a strain to credibility and unrelated to the vast majority of pot smoking. Most people who try marijuana (like cigarettes) get a cough and a choke the first time around No hallucinations. No freak trips. No sex orgies. Those who continue to experiment and use marijuana at low or moderate dosage levels seldom, if ever, experience the media-advertised hallucinations. A few choose to smoke regularly at high dosage levels and some of them hallucinate.

Lunch Available On The Grounds
