Art Swarzenruber, company president, made the presen-

tations and cited the winners dealers from across the United States were honored. The tributions to the growth of the recognition Ceremony was held company for 1972. About 350 in Cedar Rapids, Iowa.

Honey Making Exhibit

Honey bees and honey will be a featured exhibit April 23 through May 7 at the Frost Entomological Museum of The Pennsylvania State University. Dr. K. C. Kim, Museum curator, says the exhibit should be especially interesting to students.

Provided the weather is suitable, Dr. Kim and associates will have a colony of live bees in a glass-walled hive, enabling visitors to see how honey is made. Dr. Kim and associates will present several such educational exhibits during the next six months.

The Frost Entomological Museum is located in room 102 of Patterson Building at University Park.

The honey bee exhibit will use diagrams and charts to depict various stages in producing honey, from the collecting of nectar by the bees to the bottling of honey. Different types of honey will be displayed in bottles.

Cooperating on exhibit arrangements will be Dr. Allen W. Benton, bee scientist with the Agricultural Experiment Station at Penn State. Working with the project will be students associated with the museum.
