## Streams Damaged by Agnes Being Repaired

Harrisburg - Streams, damaged by Hurricane Agnes in Pennsylvania, are being restored, according to State Conservationist, Benny Martin, of the Soil Conservation Service.

Martin said the Service is using federal emergency funds to revegetate streambanks and improve channels destroyed by the flood. Thirty-six counties have now requested technical and financial aid in repairing sections of 131 streams and rivers.

Locally, Hammer Creek in Elizabeth Township, Middle Creek in Clay Township and Beaver Creek in Strasburg and Providence Townships are being repaired. Conewago Creek, in parts of Lancaster and Dauphin Counties, is also being worked on.

The State Conservationist reported that special emphasis is being placed on stabilizing streambanks with grasses and legumes. In some streams, flood debris and excess gravel are being removed to prevent flood damages to farmlands, roads,

bridges, homes, and public facilities, should another flood occur in the near future.

Close supervision of all earth moving activities by the SCS, as well as mulching and seeding, is reducing stream sedimentation and improving aquatic habitat. All stream restoration work is being done in close cooperation with the Department of Environmental Resources, the Fish Commission, and the local conservation districts.

Surveys, completed by the Soil Conservation Service, show that several hundred miles of streambanks are in need of revegetation. In addition, many streams have cut new channels and destroyed their original banks. In many areas the Service is restoring the streams to their original channels to reduce the hazards of future flooding, Martin reported.

The period of adjustment to contact lenses varies widely but most new wearers usually can keep their lenses in all day after about a month and, while minor modifications can be made easily, most wearers never require any change in their lenses at all.

## Demonstrations Given By E-town Pig Rabbit Club

The Elizabethtown Area Pig and Rabbit 4-H Club met last Thursday at the home of Stephen Horten. Dan Baum, president, brought the meeting to order.

After the opening procedures, the club discussed the possibility of building either a float or a window display for the Manheim Fair in October.

A rabbit demonstration was given by Kay Myer, followed by pig demonstrations, one by Stephen Horten and by Tom Baum.

President Baum assigned topics for demonstrations to several of the members to be given at the next meeting.

The meeting was adjourned followed by singing, games and refreshments.

The next meeting will be June 28 at the Baum residence.

New 1209 Mower/Conditioner is

**The balanced one**

Front to back . . . side to side . . . inside and out the 1209 is the balanced mower/conditioner. Exclusive high-flotation terra tires positioned up close to the cutterbar react quickly to ground contours. That's front-to-back balance, for cleaner cutting. Side-draft is all but eliminated.

Wheels are closer to the center of gravity, so nearly equal weight pulls back on right and left sides. That's side-to-side balance. There's balanced power-delivery, too—gears running in oil drive the "crumpler" rolls (crimp plus crush action). Stop in and see the 1209.
